The New-Yoak Taisuse was first issued as a small Daily paper, in April, 1841: its Weekly and Semi-Weekly editions are of more recent origin. It commenced with a few hundred subscribers and slender prospects of patronage or aid of any kind; it has now Seventy Thousand subscribers fer or constant purcharers of its regular issues, (a larger circulation than was ever attained by any other Political journal.) with an extensive Advertising business, ample materials and facilities, and an income, which is abundantly satisfactory to its publishers. These facts are recapitulated in a spirit of heartfelt gratitude to that wide American public by which its fanils have been so tenderly regarded and its merits so generously acknowledged.

The Tribune is present a lucid and accurate panorama of the living world around us. Whatever importance its Editors may attach to their own opinions, they deem it of still greater moment that their readers shall be supplied with all data essential to the formation of correct opinions for themselves. Hence special attention is given to reliable Correspondence from the most important points throughout the world, while the Electric Telegraph is largely employed in the procurement of the earliest tidings of transpiring ovents. When News presses upon our columns, Editorials as well as Contributions habitually stand back. One of the Editors and Proprietors (Bayard Taylor) has just started on a journey of observation in the interest of this paper by way of the Danube and the Levant to the recently discovered Ruins of Ninewah and thence to Upper Egypt and the sources of the Nile. His let, ters will appear in our columns throughout the ensuing year. We shall endeavor to be surpassed by no other journal in the ability and accuracy of our Correspondence and Reports from Washington during the Long Session now approaching. So with other capitals whence important advices may be expected. We are able to pay for early intelligence worth having, and whoever can anticipate all competitors in transmitting it

#### Co. In the second of the secon ESSENCE OF COFFEE.

A BOUT two years ago a new discovery was made in Europe, consisting of a substitute for the ordinary store coffee, called Essence of Coffee, which has gone into general use with astonishing rapidity, not only among the poorer classes, who at once dispensed with the use of the celebrated Chickory Coffee, but is now in general use in the wealthiest families and the first hotels, and is highly recommended by the medical faculty.

wealthiest families and the first hotels, and is highly recommended by the medical faculty.

It is extracted from pure, wholesome vegetables, and excels all similar preparatrons that have ever been offered to the public, either in this country or in Europe. Its superior quality has already been attested to in the cities by some of the most eminent physicians, and a number of the most distinguished of the clerzy and other highly respectable citizens. Coffee made from this essence according to the prescription obtains a more delicious and pleasant favor than the common store coffee, and is certainly more wholesome, especially for persons in delicate health, which will be admitted by every physician who will take the pains to test the nature and properties of this essence.

One paper costing only 12½ cts., is equal to four pounds of store coffee, will be bright and clear without the application of any other ingredient to clarify or settle it. The public are therefore invited to give this essence at least a trial before they condemn it.

A respectable merchant of Luzerne county in writing of it says:

"My customers have been using of the above Essence for some months past with general satisfaction; and I do not hesitate to recommend it to the public.

HENDERSON GAYLORD."

Manufactered by G. Hummel, Rohler & Co. 718 Callowhill street Philadelphia.
