Harper's New Monthly Magazine.

The December number commenced the fourth volume of Harper's New Monthly Magazine.

The Magazine has reached its present commons circulation simply because it gives a greater amount of reading matter, of a higher quality, in a better style, and at a cheaper price, than any other periodical ever published. Knowing this to be the fact, the publishers have spared, and will hereriter spare, no labor or expense which will increase the value and naterest of the Magazine in all these respects. The outlay upon the present velume has been from five to ten thousand dollars more than that upon either of its predecessors. The best talent of the country has been engaged in writing and illustrating original anticles for its pages; its selections have been made from a wider field and with increased care; its typographical appearance has been rendered still more elegant, and several new departments have been added to its original plan.

The object of the publishers is to combine the greatest possible variety and interest with the greatest possible variety and interest by the most attractive means.

For the very liberal patronage the Magazine has already received, and especially for the universal flattering commendations of the press, the publishers desire to express their cordula thanks, and to renew their assurances that no effort shall be spared to render the work more acceptable and useful, and still more worthy of the encourage

and still more worthy of the encotragement it has received.

Harper's New Monthly Magazine is issued invaribly on the first day of the month in which it is dated. Each number will contain 144 octave pages, in double colums; each year thus comprising nearly two thousand pages of the choicest miscellaneous literature of the day. Every number will contain numerous pictorial illustrations, accurate plates of the fashions, a copious chronicles of current events, and impariial notices of the important books of the month. The volumes commence with the numbers for Juge and December.

for June and December.

Terms.—The Magazine may be obtained from booksellers, periodical agents, or from the publishers, at three bollans a year or twenty-five certs a number. The semi-annual volunes, as completed, nearly bound in cloth, at two dollars, or the muslin covers, at twenty-five cents each, are fumished by the agents or jubirishers.

The publishers will supply specimen numbers granitously to agents and postmasters, and will make liberal arrangements with them for efforts in circulating the Magazine. They will also supply club on liberal terms, and mail and city subscribers when payment is made to them in advance. Numbers from the commencement can be supplied.

GODEY'S LADY'S BOOK FOR 1852.

THE LADY'S BOOK for the ensuing year will present many novel features suited to the advancing demands of the publisher TO TAKE THE LEAD among the popular raggazines of this country; and the host of imitators, who have been constantly following—"wichling after him in vain."—are sufficient to attest his brilliant success. The promptness with which every new idea that he suggests is sufficient reason for his not being very explicit and exact in his promises of what is yet to come. He does not wish to lay out plans for others to follow. It is sufficient, however, to say that all the existing popular features of the Lady's Book will be retained, and other new ones particularly attractive in a Lady's Book and Family Magazine, will be introduced.'

To the Magazines alone we must look for the effusions of the master-min's of Literature. It is necless to publish a list of names—suffice it to say, that we have published articles, and have others to publish from
