

GEORGE SCOTT, of Columbia County.

JACOB FRY, Jr., of Montgomery Co.

TIMOTHY IVES, of Potter County.

The bob-tail says he can't stand it any longer to see us get more offices than any other man in the county.

As to the Auditor Generalship, we never asked any delegate or other person to support us for that nomination.

His envy of our luck is no doubt sharpened with the reflection over that Mercantile Appraisership which he twice begged for and twice got—over the left.

New Arrangement.

We have now made such arrangements that the "Star" will reach nearly all its subscribers in the county north and east of this place on Wednesday afternoon.

If we can by any means find room next week for so long a document, we will publish the powerful speech of Senator Cass, on American relations with Great Britain.

For Medicines.—Whoever wishes to buy a superior new piano forte or melodeon will do well to call at this office.

The operators at the Montour Iron Works are "on a strike," to the number of several hundred, asking for back pay, and an arrangement for monthly pay in the future.

To-morrow (Friday) the township elections will take place in the several districts of this county.

Petitions are in circulation in Rush township, Northumberland county, to have that township annexed to Montour county.

The Democratic State Central Committee is called to meet at the Merchants' Hotel on next Saturday.

The epicures at Danville feast on fresh shad already.

Correspondence of the "Star" From Philadelphia.

PHILADELPHIA, March 17, '56.

The details of the terrible calamity on the Delaware will reach you in time more fully than I can give them.

Politically, everybody seems to take it for granted that Mr. Buchanan is to be the next President, and Richard Vaux the next Mayor of the City.

The landlards who were sentenced to imprisonment and fine by Judge Kelley last week for selling liquor, carried their case to the Supreme Court.

On each of the business thoroughfares of the city there is every indication of a heavy spring trade.

His envy of our luck is no doubt sharpened with the reflection over that Mercantile Appraisership which he twice begged for and twice got—over the left.

Correspondence of the "Star" FROM DELAWARE.

MILFORD, Del., March 14, '56.

Mr. Weaver.—Dear Sir.—Agreeably to promise I set down to give you and your readers a peep at this, (in many respects) interesting State, viz: Delaware.

On the map, the little State of Delaware makes but a small figure; but in the remarks about to be made, I shall pay no regard to *Mason & Dixon's Line*.

There are three qualities of soil—that of the extreme northern part, bordering upon Pennsylvania, is a constant loam, and is very productive in wheat and all the cereals.

There are some deposits of bog-iron-ore in the low lands of Sussex county in this State, from which a very superior quality of iron has been made.

This region is the Yankeeedom of the South. Settled first by the staid Scandinavian, this whole region, from its open and accessible character, was soon fully taken up and settled.

While on this subject, we take pleasure in referring to the publishing house of Messrs. Sheldon, Blakeman & Co., who published the first book we ever reviewed at length in these columns.

A little nonsense now and then, is relished by the wisest men.

It will be found to be the drollest of the droll books of the season.

It is a strange production, but so brimful of fun, that half a drop would make it run over.

It is an exceedingly funny book, the comicality of which will never grow stale.

It is just the book to smooth away business wrinkles, and provoke a little wholesome, healthful laughter.

It is a little nonsense now and then, is relished by the wisest men.

It will be found to be the drollest of the droll books of the season.

It is a strange production, but so brimful of fun, that half a drop would make it run over.

REVIEW OF NEW PUBLICATIONS.

Stoddard's Arithmetical Series.

The Juvenile Mental Arithmetic: designed for the use of Primary and Common Schools.

The American Intellectual Arithmetic: designed for the use of Schools and Academies.

The Practical Arithmetic: designed for the use of Schools and Academies.

The American Philosophical Arithmetic: designed for the use of Advanced Classes in Schools and Academies.

This series of Books have become among the most popular issued, now being used in the school districts of some States entire.

They are all carefully designed to conduct the learner from initiatory steps, by an easy and progressive gradual system, to the more advanced attainments in Mathematical Science.

The Lancaster Express says: we have examined the series carefully, and, basing our opinion on considerable experience as a teacher, we have no hesitation in pronouncing them superior to any other series which has come under our notice.

Having submitted "Stoddard's Intellectual Arithmetic" to the practical test of the school room, we have no hesitation in expressing a strong preference for it over all Text-books on the subject.

Another work "The Origin of the North American Indians," by John Melnotch, published by the same house, has for five years had a steady and remunerative sale.

But, concludes the Editor, time and space would fail us to specify all the publications of this house.

Music.—HORACE WATERS, the great Music Publisher & Piano Dealer, 333 Broadway, New York, has sent us the following popular piece of music:—

JEANNIE MARSH OF CHERRY VALLEY. Song and Chorus—Words by General Morris; Music by Thomas Baker. Price 25 cents.

Jeannie (who, by the bye, we understand to be no ideal personage) has excited the poetic muse of General Morris, and furnished an new inspiration to the most original and melodious of all our ballad composers, Thomas Baker, who has produced an admirable melody,—light, sparkling and graceful as the fair theme of both poet and musician.

Who she was born among the cherries; Of peaches, plums and nectarines; Peaches, apricots and ripe strawberries! Jeannie Marsh of Cherry Valley!

Jeannie Marsh of Cherry Valley, In whose name the menses rally; Of all the nine none so divine As Jeannie Marsh of Cherry Valley.

Who she was born among the cherries; Of peaches, plums and nectarines; Peaches, apricots and ripe strawberries! Jeannie Marsh of Cherry Valley!

Jeannie Marsh of Cherry Valley, In whose name the menses rally; Of all the nine none so divine As Jeannie Marsh of Cherry Valley.

rooms, and behold the clerks and porters selecting, packing, boxing and shipping to State after State—one is ready to cry out, great is the American Republic and destined to a perpetual youth the land thus demanding intellectual stores of wealth.

Webb's Series of Normal Readers come next in order, consisting of the Normal Primary lessons, and five ranges of Readers, of which the Hon. J. S. Randall says they are the best practical Readers that have come under his notice.

Besides the above this house publish several Standard Works in Literature, Theology and Art, which are passing through edition after edition, and having a constant and increasing sale.

Another work "The Origin of the North American Indians," by John Melnotch, published by the same house, has for five years had a steady and remunerative sale.

But, concludes the Editor, time and space would fail us to specify all the publications of this house.

1854, and arrived at Elkland township, Sullivan county, in August of the same year.—They purchased a piece of land and lived in the same house together, until May 6th 1855, when Veitengruber was missing.

On the 13th of November, James McCarty discovered what he thought to be a grave, and called to a man by the name of Smith, who came to him.

The trial progressed until Saturday morning, when a son of the deceased, aged about 11 years, was brought into Court to give testimony on the part of the Commonwealth.

At the coming in of Court in the afternoon, the boy was put upon the stand. He testified as to the identity of the clothing, pipes, &c., as belonging to his father.

At the coming in of Court in the afternoon, the boy was put upon the stand. He testified as to the identity of the clothing, pipes, &c., as belonging to his father.

an empty straw tick that belonged to a child's bed, went to the grave, uncovered the body, took it up and put in the tick—the woman assisting to place it on his shoulder, he carried it to the lake, while she returned home.

The evidence was concluded Tuesday evening, when Paul D. Morrow addressed the jury on the part of the Commonwealth followed by Dietrick and Mercer for the defence, and by Metcalf on the part of the Commonwealth.

The council for the prisoner moved for a new trial, and a rule was granted, to be argued at the May term of the Court.

The Camden ferry boat "New Jersey," belonging to the Philadelphia and Camden Ferry Company, with passengers to the number of nearly one hundred, mostly residents of New Jersey, started for Camden.

The boat was headed for the Canal, but on reaching that point, Captain Carson discovered that the ice was so jammed between the banks, that to go through would be almost an impossibility.

The boat was then turned northward, so as to cross the bar some distance above Smith's Island. When nearly opposite Arch street wharf, the boat was discovered to be on fire near the smoke stack.

The boat was then turned northward, so as to cross the bar some distance above Smith's Island. When nearly opposite Arch street wharf, the boat was discovered to be on fire near the smoke stack.
