BROOKLYN SCHOOLS. Having submitted "Stoddard's Intellectual rithmetic to the practical test of the school Having submitted "Stoddard's Intellectual Arithmetic to the practical test of the school room, we have no hesitation in expressing a strong preference for .tt over all text Books on the subject. The author has taken a decided step in advance of those who have preceded him; and his labors are likely to do much toward popularizing a study, the importance of which as a mental discipline can hardly be over estimated. The works formerly in use were difficient of systematic arrangement, were neither gradual enough in their transitions, nor sufficiently comprehensive and varied as regards their examples.—Stoddard's on the other hand, is an eminently practical book; philosophical in its arrangement, natural and lucid in its analaysis, original in its design, adapted at the commencement to the comprehension of beginners and carrying the pupil by easy inductive steps through the most complicated operations it seems invuluetable to criticism, and leaves little or nothing to be accomplished by foture authors on this subject. The examples are numerous and varied, embracing all cases likely to arise in business; and there are not less than fifty pages of questions capable of Algebraic solutions. The Chapters on Percentage, interest and Discount, are wouthy of special commendation. In these the author has an entire original plan; which enables the pupil to solve mentally, with perfect ease, questions which, without this drilling, few are able to manage even on the slate.

even on the slate.

In view of these striking and excellent features, we warmly commend Prof. Stoddard's work to all who are interested in the educa-

tion of youth.

Messrs. Sheldon, Lamport & Blakeman:—
Gentlemen—I examined the copies of Stoddard's Series of Artimetics, with which you kindly furnished me in July last, and was so well pleased with the result of that examination, that at the opening of the Fall Term of the Institute I introduced the Intellectual and the Practical, and at the commencement of the Winter Term, the Philosophical. The result has far exceeded my expectations. They have triumphantly passed that most They have triumphantly passed that mo searching of all tests for school books—the class and the recitation room. I am informed that it is your intention to report to the Board within a short time one or more series or sets of School Readers as suitable books; to be adopted and used in the Public Schools of this city.

Having used in the Institution during the past year or two a part of Webb's series (No. 2, 4, 5) with very satisfactory results; it may not be considered by you that I am taking too much liberty in expressing that desire that you may find it consistent with your views to recommend that series, and that we may thereby be allowed the privilege of continuing their use in our school.

I have examined said Readers with considerable care, and am therefore prepared to say, that I should be much gratified with their introduction; into our schoole. At least one or more new series of readers ought in my opinion to be immediately adopted for our use by the Board of Education, and I believe none would more generally please the teachers of our school, or tend to interest and edify their pupils or lead to more satisfactory results than the series under consideration.

The selections are varied, interesting and instructive and containing some of the purest gems of thought and expressions to be found in the language.

To the student they afford the necessary tacilities for becoming a good reader, at the same time they are all calculated to form a correct taste to instil noble and elevated sentiments, and to impart a relish for those pleasures which arise from the contemplation of the heautifal and good.

They are well adapted for Text Books in our Common Schools. I have heard several very competent teachers speak in high terms of the series.

EDITH; OR, THE QUAKER'S DAUGHTER, A tale of Puritan times. By, one of her descendants. I vol. 12mo. Price \$1 25. \\
The sceine of this Domestic Tale is listed during that religious persecution of the Quakers which is so deep and sad a stain upon the bright fame of the Puritans. To the charm of absorbing interest as a tale, it adds the aftraction of historical accinracy.

We have never announced new books with greater satisfaction than in the present instance. These are not sensation books.—They do not in any respect belong to the "guter literature," of the day. Differing widely in plot, purpose and style, they may alike lay claim to fascinating interest and an adaption to improve both head and heart.
