

WHEELER'S PATENT CHAIN HORSE POWERS,
OVERSHOT THRASHERS, FEED CUTTERS, &c.

The above cut represents a single or one horse machine with the lands necessary to attend it.

The subscribers take this method of informing the public in general, that they have for some time been carrying on, in all their various branches, the manufacture and sale of Wheeler's Patent Chain Horse Powers, together with Overshot Thrashers, Feed Cutters, Revolving Horse Rakes, &c., in Light Street, Columbia Co., and the town of Northumberland, Northumberland Co., Pa.

The Horse-Powers are strong and durable, and very simple in their construction; run light, and are not liable to get out of order. With a slight variation, the weight alone of the horse or horse drives the Thrasher with force and speed. They may also be used for various other purposes, such as driving Circular Saws, Turning Lathes, Boring Machines, Grind-Stones, Churns, &c.

The Overshot Machines have several advantages over the machines now in use. They are of feeding table level, and of a proper height to allow the feeder to stand erect, and feed evenly and easily without annoyance from dust; sticks and stones are not liable to get into the thrasher, and the grain is not scattered by the thrasher down to the separator. The two horse machine, attended by from two to three hands, will thrash from 100 to 150 bushels of wheat, or double the amount of oats per day. The one horse machine, attended by two or three hands, will thrash from 60 to 75 bushels of wheat, or double the amount of oats per day. The Feed-Cutter is a first rate article, and is very much used. It cuts fine and very fast stalks are cut by it 3-8 of an inch long, at the rate of from 800 to 1000 sheaves per day.

The foregoing is a brief statement of the qualities and character of our machines. There probably is a larger number of Wheeler's Patent Powers made and sold than any other kind. We offer our machines to the farming community with full confidence in their merits, and invite all interested to call and examine them before purchasing elsewhere.

For further particulars, or for purpose of ordering machines, address the subscribers at Light Street, Columbia Co., or at Northumberland, Northumberland Co., Pa., or apply to the following agents:—Jacob Hartman, Milton; Joseph Vankirk, near Northumberland; John Derr, near Selinsgrove; Jacob Barnhart, Hartman, Hamilton; Daniel K. Knepper, New Berlin.

SALAMANDER SAFES;
 EVANS & WATSON,
 No. 26 South Fourth St., PHILADELPHIA.

Great Fire, Chestnut & Fifth Streets, MONDAY MORNING, DECEMBER 15th, 1854. EVANS & WATSON'S SALAMANDER SAFES TRIUMPHANT, as they always are when put to the test.

Philadelphia, Dec. 15th, 1854. Messrs. Evans & Watson, No. 26 South Fourth Street, Philadelphia.—Gentlemen:—We take pleasure in recommending your Salamander Safes to merchants and others in want of a secure means of preserving their books, papers, &c., from fire, as the one we purchased from you about seven months since has preserved our books, papers, and cash in as good condition as they were when put into it, before the great fire of this morning, which destroyed the entire block of buildings corner of Chestnut and Fifth Streets. The above safe was in use in our office, on the second floor of our building, from which place it fell into the cellar, and remained there until the fire was out. The safe was then removed, and opened in the presence of at least 1000 persons, who witnessed the good condition of the contents. Will you please have the safe and locks repaired, as we intend to put it in use again, having perfect confidence in its fire proof qualities. Yours, respectfully, LACEY & PHILLIPS.

Evans & Watson take pleasure in referring to the following, among the many hundreds, who have their Safes in use:—U. S. Mint, Philadelphia; Farmers & Merchants' Bank, Philadelphia; Samuel Allen, Esq. High Street; Philadelphia; Railroad, Philadelphia; City Controller, Calves & Co., No. 123 Market Street; Richard Norris & Son, Locomotive Builders, Philadelphia; Boneroff & Sellers, Machinists, corner 16th and James Streets; Franklin Fire Insurance Co., Philadelphia; Pennsylvania Railroad, Philadelphia; Lacey & Phillips, corner of 5th and Market Street; Sharpless Bro., No. 32 South Second Street; James, Kent & Santee, No. 147 North Third Street.

A large assortment of the above Safes always on hand at our place, at least 10 per cent. more in price than any Herring's Safe now in use. Evans & Watson also manufacture and keep for sale, Iron Shutters, Iron Doors, and Iron Sash, for making fire proof Vaults, for Banks, stores, private and public buildings. Copy Right, Patent Press; Patent State Lined Refrigerator, &c.

Please give us a call at No. 26 South 4th Street Philadelphia.

EVANS & WATSON.

TONICS WON'T DO.

They never did do more than give temporary relief and they never will. It is because they don't touch the cause of the disease. The cause of allague and bilious diseases is the atmospheric poison called Miasma or Malaria. Neutralize this poison by its

NATURAL ANTIDOTE.

and all diseases caused by it disappears at once. Rhodes' Fever and Ague Cure is this Antidote to Malaria, and moreover it is a perfectly harmless medicine. The certificate of the celebrated chemist, J. R. Childen, of New York, to this effect, is attached to every bottle; therefore if it does no good it can do no harm.

This is more than can be said of Quinine, Arsenic, or any tonic in existence, as their use is ruinous to the constitution and brings on DUMB AGUE, which never allows a person to feel perfectly well for a single moment. In illustration of these truths I annex some extracts from a letter just received from a Physician.

Georgetown, Ohio, March 17, 1856. J. A. RHODES, Esq.—Dear Sir: Yours of 2d inst. is at hand. The Cure arrived late last year and the difficulty in getting any one to try it was greatly increased from the fact that a remedy had been introduced, which was growing in favor with the public, as being better than using Quinine,—not knowing I presume that the remedy they needed to escape taking Quinine, contained the DRUG ITSELF.

This remedy, (known as "Smith's Tonic") would invariably BREAK AN AGUE, but it did not CURE it, and it would often return with renewed vigor. The one circumstance I deemed in your favor, if I could institute a test comparing the two, was, as it was in all such cases, slow, wearing them out, and laying the foundation of other and severer maladies. I did succeed in effecting a radical cure of all three of these cases with your remedy, and they have not had a chill since. In all three of the cases the "Smith's Tonic" had been used, and would, as before stated, break the chill, but after a period or two had elapsed it would return.

I think there will be no difficulty now in giving to your "Cure" the vantage ground of any other remedy now in use by me. I am, Sir, WILLIAM BUCKNER, M. D. RHODES' FEVER AND AGUE CURE, or Antidote to Malaria, the only harmless remedy in existence, is equally certain as a PREVENTIVE, as a "CURE." Take it when you feel the chill coming on, and you will never have a single one.

JAMES A. RHODES, Proprietor, Providence, R. I.

For sale by Druggists generally. June 18, 1856.
