are strong and durable, and very simple in their construction: run light, and are not mable to get out of order. With a slight elevation, the weight alone of the horse or horses drives the Thrasher with force and speed. They may also be used for various other process such addiving Circula Saws. ther purposes, such a driving Circular saws, Furning Lathes, Boring Machines, Grind-Churns, e'c. etc

Stones, Churns, etc. etc.

The Overshot Machines
have several advantages over the machines now in use. The apron or feeding table is level, and of a proper height to allow the feeder to stand erect, and feed evenly and casily without annoyance from dost; sticks and stone are not liable to get into the thrasher, and the grain is not scattered, but thrown down to the separator. The two horse machine, attended by from two to three hands, will thrash from 100 to 150 bushels of wheat, or double the amount of cats per day. The one borse machine, attended by two or three hands, will thrash from 50 to 75 bushels of wheat, or double the amount of cats per day. The Feed-Culter is a first rate article, and is very much used. It cuts fine and very fast; stalks are cut by it 3-8 of an inch long, at he rate of from 300 to 500 sheaves per day.

The foregoing is a brief statement of the qualities and character of our machines.—
There probably is a larger number of Wheeler's Patent Powers made and sold than any other kind. We offer our machines to the farming community with full confidence in their merits, and invite all interested to call and examine them before purchasing elsewhere.

The Cure arrived late last year and the difficulty in getting any one last year and the difficulty in getting any one to try it was greatly increased from the fact that a remedy had been introduced which was growing in favor with the public, as being better than using Quinine,—not knowing I presume that the remedy they needed to escape taking Quinine, contained the DRUG ITSELF!

This remedy, (known as "Smith's Tonie,") would invariantly BREAK an ague, but it did not CURE it, and it would often return with renewed vigor. The one circumstance I deemed in your favor, if I could institute a test comparison between it and your CURE.

The Author of the above volume is a gradu-ate of one or the first medical schools in the United States, and having devoted a quarter of a century to the study and treatment of Syphilis and kindred disorders as a speciality, he has become possessed of most invaluable informa-tion in regard to the same, and is able to com-poss into vade meeting compositive to very country.

become possessed of most invaluable information in regard to the same, and is able to compass into vade mecum compass the very quintessence of medical science on this important
subject; as the result of the experience of the
most eminent physician in Europe and America is thoroushly demonstrated in his own
highly successful practice in the treatment of

the City of Philadelphia alone.

The practice of Dr. Hunter has long boen,
and still is literally unbounded, but at the earnest solicitation of numerous persons, he has
been induced to extend the sphere of his professional usefulness to the community at large,
through the medium of his "Medical Manual
Hand-Book for the Afflic'ed."

It is a volume that should be in the har,d of

The author argues particularly, most strongly against every species of self-defilement, and warns parents and guardians, in searching terms, to guard the young of both sexes from the terrible consequences concomitant of their ignorance of physiological laws and sexual impurities and irregularities, whether exhibiteny precocious development or arising from the viscious and corrupting examples of their schoolmates or otherwise. To those who have been already ensanced to the "paths that take hohi on hell," a clear and explicit way is shown by which they may secure a return of sound health and a regeneration of the soul from its terribulation. INVALIDS INVALIDS

Are apprised that Dr. KINKELIN confines his practice to a particular brench of medicine, which engages his individual attention. He cautions the unfortunate against the abuse of mercury; thousands are annually mercurialized out of life. Recent affections are promptly extinguished.

TWENTY YEARS' EXPERIENCE In the treatment of a class of diseases hith erto neglected and imperfectly understood, has enabled Dr. KINKELIN, Author of a work on Self Preservation, to prove hat ninetenths of the causes of nervous debility, local and constitutional weakness, mental and physical suffering, are traceable to certain habits, forming the most secret yet deadly and latal springs of domestic misery and premature mortality.

TAKE PARTICULAR NOTICE

TAKE PARTICULAR NOTICE, TAKE PARTICULAR NOTICE,
There is an evil habit sometimes indulged in by boys, in solitude, and which, if not reformed in due time, not only begets serious obstacles to matrimonial happiness, but gives rise to a series of protracted, insidirus, and devastating afflictions. Few of those who give way to this pernicious practice are aware of the consequences, until they find the nervous system shattered, feel strange and unaccountable feelings, and vague fears in the mind.

The unfortunate thus affected becomes feeble, is unable to labor with accustomed vigor, or to apply his mind to study; his step is tardy and weak, he is doll, irresolute, and engages in his sport with less energy tian

engages in his sport with less energy than If he emancifate himself before the practice has done its worst, and enter matrimony, his marriage is unfruitful, and his sense tells him that this is caused by his early follies.—
These are considerations which should awaken the attention of those similarly situated.

MARRIAGE Requires the fulfillment of several conditions in order that it may be really the cause of mutual happiness. Could the veil which covers the origin of domestic wretchedness be raised, and its true source in every inbe raised, and its true source in every in-stance disclosed—in how many could it be traced to physical disqualifications and their attendant disappointments! Apply then while it is yet time, in order to have your unstrong and relaxed organization rebraced, revivified and strengthened.

REMEMBER. He who places himself under Dr. Kinkelin's treatment may religiously confide in his honor as a genteman, and rely upon the assur-ance, that the secrets of Dr. K's patients will

In these fires, the HERRING'S SAFE, standing side by side with those advertised as "warranted to stand 10 per cent. more fire than Herring's," came forth the acknowledged victor, not only preserving their contents in excellent order, but being themselves in a condition to go through another ordeal, while the beasted "Salemanders" of other makers were badly used up in every instance, and in some cases their entire contents completely destroyed.

To the public we would simply say, that, during the fourteen years of the Herring's Safe has been before them, more than two hundred have passed through accidental fires without the occurrence of a single loss.

We would, therefore, caution purchasers against the misrepresentation of interested parties. The Herring's Patent is the only Fire-proof Safe made in this city which is protected by a Patent Right, and we will guarantee it to resist more than double the guarantee it to resist more than double the
