The above cut represents a single or one horse machine with the hands necessary to

The subscribers take this method of in-The subscribers take this method of in-forming the public in general, that they have for some time been carrying on, in all their various branches, the manufacture and sale of Wheeler's Patent Chain Horse Powers, together with Overshot Thrashers, Feed Cut-ters, Revolving Horse Rakes, &c., in Light Street, Columbia co., and the town of North-umberland, Northumberland co., Pa.

The Horse-Powers

are strong and durable, and very simple in their construction: run light, and are not liable to get out of order. With a slight elevation, the weight alone of the horse drives the Thrasher with force and speed. They may also be used for various other purposes, such a driving Circular Saws, Turning Lathes, Boring Machines, Grind-Stones, Churns, etc. etc.

The Overshot Machines
have several advantages over the machines
now in use. The apron or feeding table is
level, and of a proper height to allow the
feeder to stand erect, and feed evenly and
easily without annoyance from dost; sticks
and stone are not liable to get into the
thrasher, and the grain is not scattered, but
thrown down to the separator. The two
horse machine, attended by from two to
three hands, will thrash from 100 to 150
bushels of wheat, or double the amount of
oats per day. The one horse machine, attended by two or three hands, will thrash
from 50 to 75 bushels of wheat, or double
the amount of cats per day. The FeedCutter is a first rate anticle, and is very much
used. It cuts fine and very fast; stalks are
ently it 3-S of an inch long, at he rate
of from 300 to 500 sheaves per day.

The foregoing is a brief statement of the
qualities and character of our machines.—
There probably is a larger number of
Wheeler's Fatent Powers made and sold
than any other kiad. We offer our machines to the farming community with full
confidence in their metils, and invite all interested to call and examine them before
purchasing elsawhere.

THE undersigned, having just received the latest Paris and New York Fashions, would again beg leave to inform his numer ous friends and all the world about Blooms burg, that he is now better prepared than ever to accommodate any one with the neatest, easiest and best fitting suits of Clothes that have been turned out lately; and not only that, but he will also do them up in the best order, upon the lowest terms.

Its shop is at the old stand, (too welk known to need further notice) where he may at all times be found, seated upon the beach of repentance, steadily drawing out the thread of affliction, hopeing it may in the end prove advantageous to him and his customers. He would also advise his friends to bear in minus that poor, afflicted tailors must live, or they can't be expected to work. Therefore, Wheat Rye, Corn, Oats, Potatoes, and with all now and then a little CASH will come mighty handy from those who are back-standing on his book.

Messrs. Evans & Watson, No. 26 south
Fourth Street, Philadelphia,—Gentlemen:—
We take pleasure in recommending your
Salamander Sales to merchants and others
in want of a secure means of preserving
their books, papers, &c., from fire, as the
one we purchased from you about seven
months since has preserved our books, papers, and cash in as good condition as they
were when put into it, before the great fire
of this morning, which destroyed the entire
block of buildings corner of Chestnut and
fifth Streets. The above Safe was in use
in our office, on the second floor of our building, from which place it fell into the cellar,
and remained there until the fire was out.—
The safe was then removed, and oppened in
the presence of at least 1000 persons, who
witnessed the good condition of the contents.
Will you please have the Safe and locks repaired, by we intend to put it in use again,
having perfect confidence in its fire proof
qualities. Yours, respectfully,

TWENTY YEARS' EXPERIENCE

otherwise the pride and flower of the nation.

The author orgues particularly, most strongly against every species of self-deflement, and warns parents and guardians, in searching terms, to guard the young of both sexes from the terrible consequences concomitant of their ignorance of phylological laws and sexual mad purities and irregularities, whether exhibitery precocious development or arising from the viscious and corrupting examples of their schoolmates or otherwise. To those who have heed already ensured to the "paths that take hold on hell," a clear and explicit way is shown by which they may secure a return of sound health and a regeneration of the soul from its terrible pollution.

In these fires, the HERRING'S SAFE, standing side by side with those advertised as "warranted to stand 10 per cent, more fire than Herring's," came forth the acknowledged victor, not only preserving their contents in excellent order, but being themselves in a condition to go through another ordeal, while the beasted "Salemanders" of other makers were badly used up in every instance, and in some cases their entire contents completely destroyed.

in some cases their entire contents completely destroyed.

To the public we would simply say, that, during the fourteen years of the Herring's Safe has been before them, more than two hundred have passed through accidental frees without the occurrence of a single loss.

We would, therefore, caution purchasers against the misrepresentation of interested parties. The Herring's Patent is the only Fire-proof Safe made in this city which is protected by a Patent Right, and we will guarantee it to resist more than double the amount of heat of any other Safe now known.
