

**WHEELER'S PATENT CHAIN HORSE POWERS,**  
TO THE FASHIONABLE AND OPERATIVE.

THE undersigned, having just received the latest Paris and New York Fashions would again be glad to inform his numerous friends and all the world about Bloomsburg, that he is now better prepared than ever to accommodate any one with the latest, easiest and best fitting suits of Clothes that have been turned out lately; and not only that, but he will also do them up in the best order, upon the lowest terms.

His shop is at the old stand, (too well known to need further notice) where he may at all times be found, seated upon the bench of repentance, steadily drawing out the thread of affliction, hoping it may in the end prove advantageous to him and his customers. He would also advise his friends to bear in mind that poor, afflicted tailors must live, or they can't be expected to work. Therefore, Wheat Eye Corn, Oats, Potatoes, and with all now and then a little CASH will come mighty handy from those who are back-standing on his book.

Remember, gentlemen, that in all cases "the laborer is worthy of his hire."

**BERNARD RUPERT.**  
Bloomsburg, April 14th, 1853.

**OVERSHOT TURBINES, FEED-CUTTERS, &c.**

The above cut represents a single or one horse machine with the hands necessary to attend it.

The subscribers take this method of informing the public in general, that they have for some time been carrying on, in all their various branches, the manufacture and sale of Wheeler's Patent Chain Horse Powers, together with Overshot Turbines, Feed Cutters, Revolving Horse Rakes, &c., in Light Street, Columbia Co., and the town of Northumberland, Northumberland Co., Pa.

**The Horse-Powers** are strong and durable, & very simple in their construction; run light, and are not liable to get out of order. With a slight elevation, the weight alone of the horse or horses drives the Thrasher, or force, and speed. They may also be used for various other purposes, such as driving Circular Saws, Turning Lathes, Boring Machines, Grind-Stones, Churns, &c., etc.

**The Overshot Machines** have several advantages over the machines now in use. The apron or feeding table is level, and of a proper height to allow the feed to stand erect, and feed evenly and easily without any chance of clogging; sticks and stone are not liable to get into the thrasher, and the grain is not scattered, but thrown down to the separator. The two horse machine, attended by from two to three hands, will thrash from 100 to 150 bushels of wheat, or double the amount of oats per day. The one horse machine, attended by two or three hands, will thrash from 50 to 75 bushels of wheat, or double the amount of oats per day. The Feed-Cutter is a first rate article, and is very much used. It cuts fine and very fast; stalks are cut by it 2 1/2 of an inch long, at the rate of from 300 to 500 sheaves per day.

The foregoing is a brief statement of the qualities and character of our machines. There probably is a larger number of Wheeler's Patent Powers made and sold than any other kind. We offer our machines to the farming community with full confidence in their merits, and invite all interested to call and examine them before purchasing elsewhere.

For further particulars, or for purpose of ordering machines, address the subscribers at Light Street, Columbia Co., or at Northumberland, North D. county, Pa., or apply to the following agents: Jacob Hartman, Milton; John Derr, near Northumberland; John Derr, near Selinogrove; Jacob Barnhart, Lewisburg; A. & J. Eves, Milton; Samuel Hartman, Hartleton; Daniel Kleckner, New Berlin.

Philadelphia, Dec. 15th, 1854.

Messrs. Evans & Watson, No. 26 South Fourth Street, Philadelphia, Gentlemen:—We take pleasure in recommending your Salamander Safes to merchants and others in want of a secure means of preserving their books, papers, &c., from fire, as the one we purchased from you about seven months since has preserved our books, papers, and cash in a good condition, as they were when put into it, before the great fire of this morning, which destroyed the entire block of buildings corner of Chestnut and Fifth Streets. The above Safe was in use in our office, on the second floor of our building, from which all our goods, cellars, and remained there until the fire was out. The safe was then removed, and opened in the presence of at least 1000 persons, who witnessed the good condition of the contents. Will you please have the Safe and locks repaired, as well as to put it in use again, having perfect confidence in its fire proof qualities. Yours, respectfully,  
LACEY & PHILLIPS.

Evans & Watson take pleasure in referring to the following, among the many hundreds, who have their Safes in use:—U. S. Mint, Philadelphia; Farmers & Merchants' Bank, Philadelphia; Samuel Allen, Esq., High Cellar, Philadelphia; John N.
