**BARLEY WITHOUT BEARDS!!**  
It is even so. A variety of barley has been discovered in the gulches of the Helderberg Mountains, entirely free from those annoying and poisonous beards, attached to all our common varieties. The undersigned obtained 7 crates of this new variety three years ago, and being much pleased with its general appearance and productiveness, has spared no means to multiply this small quantity as fast as the Shagbark and other birds would allow. It is merits for grinding or malting have not been tested, and the quantity is now too small to squander in that way. Every tiler of the soil who sees it, is anxious to have a few grains, not doubting it will prove a valuable acquisition. I have sufficient however, to furnish all persons interested who will be likely to see this notice, with one lead each, containing 30 to 60 grains. Send me your address, on a stamped envelope and I will enclose a head by return mail, with printed instructions for cultivating in a way to insure a large return from a small quantity of seed. Should this new variety be found to answer all the purposes of the common barley, a few years will suffice to drive the "barley beards" from the country. Should any person desire more than the one lead, I will send a package of 700 to 800 grains securely enveloped, by mail post paid for 25 cts., accompanied with a few heads to prove the fact of its being beardless.  
Address, I. W. BRIGGS,  
Feb. 3, 1857-3d.
