Physician: Georgetown, Ohio, March 17, '56. JAS. A. RHODES, Esq.—Dear Sir: Yours of 2d inst. is at hard. The Cure arrived late last year and the difficulty in getting any one to try it was greatly increased from the fact that a remedy had been introduced which was growing in favor with the public, as be-ing better than using Quinine,—not knowing I presume that the remedy they needed to escape taking Quinine, contained the DRUG ITSELF!

I presume that the remely they needed to escape taking Quinine, contained the DRUG ITSELF! This remedy, (known as "Smith's Tonio,") would invariably BR!-AK an ague, but it did not CURE it, and it would often return with renewed vigor. The one circumstance I deemed in your favor, if I could institute a test comparison between it and your CURE. The tollowing is the result: Three persons took your "Cure," all of which were cases of "Quotidian Intermit-tent Fever," of many weeks standing. They had tried Quinine, and other remedies, occa-sionally missing a chill, but it was, (as infail such cases, slowly wearing them out, and laying the foundation of other and severef, maladies. I did succeed in effecting a radi-cal cure of all three of these cases with your remedy, and they have not had a chill since. In all three of these cases the "Smith's Ton-ic" had been used, and would, as before sta-tod, break the achill but often environment.
