CONSUMPTION, A ND ALL DISEASES OF THE LUNGS and THTOAT are positively corable by inhalation, which conveys the remedies to the cavities in the lungs through the air pas-sages, and coming in direct contact with the disease, neutralizes the tubercular matter, allays the cough, causes a free and easy ex-pectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous sys-tem, giving that tone and energy so indis-pensable for the restorative of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of nualloyed pleasure. It is ar much under the control of medical treatment as any other formidable disease; ninety out of every hum-dred cases cau be cured in the first stages, and fity per cent. in the second, but in the third stage it is impossible to save more than five per cent., for the lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, in-halation affords extraordinary relief to the sons in the United States alone; and a correct calculation shows that out of the present pop-ulation of the earth, eighty millions are des-ined to fill the consumpure's grave. Troly the quiver of death has no arrow so The yeas and nays were taken agreeably to the provisions of the Constitution, and were as follow, viz : YEAS-Messre. the free admission of air into the air cells, which causes a weakened vitality through the entire system. Then surely it is more mational to expect greater good from redi-cines entering the cavities of the lungs than from those administered through the siom-ach; the patient will always find the lungs free and the breathing easy after inhaling remedies. True, inhalation is a local remeily, nevertheless it acts constitutionally, and with more power and certainty than rem-edies administered by the stomach. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility in a tew min-nies, paralyzing the entire nervous system, so that a limb may be amputated without the sightest pain; inhaling the ordinary burning gas will destroy life in a few hours. The odor of many of the medicines is per-ceptible in the skin a few minutes after being inhaled, and may be immediately detected in the skin a few minutes after being inhaled, and may be immediately detected in the skin a few minutes after being inhaled, and may be invice by breath-ing foul air. Report of the Committee appointed to superintend the burning of the Iron Safes at Reading, Feb. 27th, 1857.

Safes at Reading, Feb. 27th, 1857. READING, March 4th. The undersigned, members of the Commit-tiee, do respectfully report, that we saw the two Safes originally agreed epon by Farrels & Herring and Evans & Watson, placed side by side is a fornace, viz: The Safe in use by the Paymaster of the Philadelphia and Read-ing, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz, in his store, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz, in his store, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz, manufactured by Evans & Watson, and put in books and papers precisely alike. The fire was started at 8 do 'clock, A. M., and kept up until four cords of green hickory, two cords dry oak and half chestnut top wood were enturely consumed, the whole under the superintendence of the subscribers, mem-bers of the Committee. The Safes were then cooled off with water, after which they were opened, agd the books and papers taken out by the Committee and sent to H. A. Lauz's store for public examination, after they were first examined and marked by the Commit-tee. The books and papers taken from the Safe manufactured by Evans & Watson were but slightly affected by the intense beat, while those taken from the Safe manufac-tured by Farrels & Herring were, in our judg-ment, damand tully Hinteff per cent. mere-than those taken from Evans & Watson's Safe. JACOB H. DYSHER, CIIAMPION!!
