ferred upon me by the Constitution, I have deemed it my imperative duty to convene the General Assembly at this time. As explated by the Constitution, has arisen, and accordingly you have been called together to take into consideration and adopt such to take into consideration and adopt such measures of relief as the present exigencies may seem, in your wisdom, to demand. A sudi'en and severe financial revolsion

has occurred, inducing a suspension of spe-cie payments by the banks of this Commonwealth and in some of our sister States.—
This was unavoidable, having become, from the operation of causes necessary now to be enumerated, a stern necessity. Thus circumstanced, the community are suffering from the want of a currency; the destruction of confidence, and the numerous evils consequent on financial embarrassment. Every department of industry has felt and been disastrously affected by the shock; trade and commerce have been paralyzed; the mer chant, the manufacturer, the mechanic have seen their bright prospects suddenly blasted and many have been involved in a ruin which no ordinary sagacity or foresight could

Many of our furnaces, rolling mile, and factories have been closed, extensive and valuable coal operations have been suspended or abandoned, and thousands of workmen are out of employment, oppressed with doubt and anxiety, and alarmed with gloomy apprehensions of the future. It is not my ention to discuss in this communication the cause of the present financial difficulties and commercial embarrassment. The evil is upon us, troubles surround us, and to relieve the community, restore confidence, and bring back the prosperity lately enjoyed, and which it is hoped, is but temporarily interrapted, prompt and harmonious action, wire and generous legislation, will be required .-The present exigency requires, and every est of the Commonwealth and the people seem to demand, that the banks should be released from the penalties and forfeitures incurred, and a suspension should be authorized for such reasonable period as will enable them sefely to resume the payment of their liabilities in specie. To force the Banks into a too early liqui-

dation, would compel them to require immediate payment from their debtors, and would entail upon the community the miseries of wide-spread bankruptcy and ruin; while on the other hand, an unreasonable extension of the unnatural state of suspension would greatly increase the evils of an tredeemable paper currency. The resumption of specie payments should not be postponed longer than is clearly necessary and the best interests of the community may require.

The general embarrassment and depression of trade and commerce, and the consequent depreciation of the value of real and rersonat property, if permitted to continue, will se riously affect the revenue of the Common wealth; the credit of the State, now so well sustained and so honorable to her character, may be endangered, not by any liability to pay, but from the difficulty, if not the impossibility of procuring a medium in which payment can be made.

The faith of the State must be preserved intact. I therefore recommend that the Banks, which may be relieved from the penalties upon such suspeasion by existing taws, shall be required to make a satisfactory arrangement with the State Treasurer, by which he will be enabled to convert the current funds in the Treasury and balances standing to his credit in any of the solvent Bunks of the Commonwealth into specie, as soon as the same shall become necessary for the payment of the interest on the fund-

ed debt.

And as a further relief to the community, and as a condition of the release of the pen-alties and forfeitures incurred, it is respectfully recommended that the solvent banks of the Commonwealth, which paid specie for all their liabilities, immediately prior to their late general suspension, shall be re-quired (under such limitations and restrictions as may be deemed expedient,) to receive the notes of each other, continuing soltent at par, in payment of all debts due, or to become due to them respectively during their suspension, the bank or banks resuming specie payments to be relieved from this

For the relies the debtots, provision should be made for an extension of the time in which eqecutions on judgments may in crease the period no provided by law, for the stay of executions.

The issue of relief or bank notes of a less denomination than five dollars should not now be authorized, nor should the Banks, during their suspension, be permitted to de clare dividends exceeding six per cent. per

The monied institutions of the Commonwealth, it is believed, are generally in a sound and solvent condition, and if the measures suggested be adopted, the banks will be enabled to meet all their liabilities, supply a currency adequate to the demands of legitimate trade and the ordinary business of life tegain public confidence, aid and revive every branch of industry, and save their credi ors and the community from the bank. rupicy and ruin, inevitably consequent on the intense pressure of the present financial

During 20 years of practice, I have rescued from the last stages of the above mentioned diseases had bean given up to die by their physicians, which warrants me in promising to the afflicted, who may place themselves under my care, a periect and most speedy cure. Secret diseases are the greatest enemies to health, as they are the first cause of Consumption, Serofula and many other diseases, and should be a terror to the human family. As a permanent cure is scarcely ever effected, a majority of the cases falling into the hands of incompetent persons, who not only fail to cure the diseases but ruin the constitution, filling the system with mercury, which, with the disease, hastens the sufferer into a rapid consumption. But should the disease and the treatment not cause death speedity and the victim marries, the disease is entailed upon children, who are born with feeble constitutions, and the current of life corrupted by a virus which betrays itself in Scrofula, Tetter, Ulcers, Eruptions and other effections of the skin, Eyes, Throat and Lungs, entailing them to an early glave.

Self-abuse is another formicable enemy to health, for nothing else in the dread catalogue of human diseases causes so destructive a drain upon the system, drawing its thousands of victims through a few years of suffering down to an untimely grave. It destroys the Nervous system, rapidly wastes away the energies of life, causes mental derangement, prevents the proper development of the system, disqualifies for marriage, society, business, and all earthly happiness, and leaves the sufferer wrecked in body and mind, predisposed to consumption and a train of evils more to be dreaded than death itself. With the fullest confidence I assure the unfortunate victims of self-abuse that a permanent and speedy cure can be effected, and with the abandonment of ruinous practices my patients can be restored to robust, vigorous health.
