Working thus on a very large scale, and under a rigid system, they are able to secure a perfect and uniformity in the quality throughout the year. This is the great Desideratum in Starch-making, and is realized now for the first time.

The very best starch that can be made, and no other, is always watted by consumers, and while this will be supplied to them by the grocers, as soon as their customers have learned which is the best, and ask for it—otherwise they would be likely to get that article on which the largest profit can be made.

Mr. Kingsford has been engaged in the manufacture of starch continuously for the last 27 years, and during the whole of the period, the starch made under his supervision has been, beyond any question, the best in the market. For the first 17 years, he had the charge of the works of Wm. Colgate & Co., at which period he invented the process of the manufacture of corn starch.

Extract from the Committee's Report on the Trial of Iron Safes at Reading:

"On the 26th of February all the members of the Committee met to witness the Safes and books and papers, (placed in them) and were perfectly satisfied that all was right.—

The day following, the burning took place, under the supermendence of the Committee. After a fair and impartial burning for five hours, the Safe of Messrs. Evans & Watson was first opened, the Safe being on fire inside, and the contents partially consumed, while the contents in the Safe of Messrs. Farrels & Herring were in good condition, and no fire inside."
