They apparently were holding an inquest over the dead body: As we stood unobserved by the lads, we were able to hear their opinions,—they we were able to hear their opinions,—they ternal development and melioration rather manifested no backwardness, but spoke that by external aggression and extensional their minds. THE recent trials at Reading have endorsed the current of public opinion, and confirmed the verdict of more than 200 accidental fires, proving conclusively that "Herring's" is the only safe that will not burn.
Extract from the Committee's Report or the Trial of Iron Sales at Reading:
"On the 26th of February at the members of the Committee met to witness the Sales and books and papers, (placed in them) and were perfectly satisfied that all was right.—The day following, the burning took place, under the superintendence of the Committee. After a fair and impartial burning for five hours, the Safe of Messrs. Evans & Watson was first opened, the Safe being on fire inside, and the contents partially consumed, while the contents in the Sale of Messrs. Fairels & Herring were in good condition, and no fire inside."
