STAR OF THE NORTH.

Bloomsburg, Wednesday, October 17, 1860.

'Our LOCAL column for weeks has been crowded ont. Hereafter we will endeavor to localize at least what transpires.

The premium for trotting at the Montour Columbia county. The same animal received a premium at the State Fair for fast walking.

THE Williamsport Press comes to us both enlarged and improved. This is an evidence of its being liberally supported. The next mark of enterprise the Press makes, should be to improve its politics.

D. L. EVERHART advertises, in our paper, his Hotel Property, situate in Light Street. It can be had upon reasonable terms. The property is a tolerably good one, and with will profitably reward any person who purchases it.

Sxow .- We were very much surprised, on Monday morning last, to find the ground completely covered with snow. We are informed it fell to the depth of from four to five inches north of this place. In this place it was not half so deep, and soon departed, leaving our streets in a soft and wet condition.

The buckwheat crop in the northern part of our county this season is quite good, and of excellent quality. This will be cheering news no doubt to the lovers of "buckwheat cakes." We have seen flour in market, but it was probably from old grain. A due supply will soon make its appearance. Our patrons will not forget us, etc.

.... THE coal trade this season so far has been very heavy. Few have the remotest idea of the amount of coal constantly passing our place, by canal and on railroad except those whose business calls them in the immediate neighborhood of these great thoroughfares. No true estimate can possibly be given. The trade is increasing rap-

RAYMOND'S FAMILY SEWING MACHINE!

PATENTED MARCH 9, 1858. PRICE \$10 EACH.

MESSES. ZUPPINGER & ROBBINS, of Bloomsburg, having purchased the exclusive right of the above valuable Impro-

ved Chear Patent Sewing Machine, for the County of Columbia, will be happy to Northern Governess, in the land of sugar, supply their friends with the article for the rice. tobacco and cotton. Edited by accommodation of themselves and families. Professor J. H. Ingraham, of Mississippi. The following are some of the superior advantages this implement possesses, viz: 1. It sews from 400 to 600 tight stitches

per minute. 2 Double thread Machines are from the more complicated character of their mechanism invariably insuaged and it readed with more or less difficulty; but so with RAYMOND'S, a child can manage it in two hours, and it is threaded easier that a common needle.

3. One of the most valuable features of this Machine, is the smallness and the compactness of its mechanism.

4. I' can be attached to a board table or siand, in operating order, and removed in less than half a minute.

5. It greatly economizes the thread, and yet produces a seam, sufficiently strong for any work for which it is intended, a qualification not known to all kinds of Sewing Machines.

6. No human hand is capable of producing a seam so regular and systematic .---The seam is so strong if well done, that the strongest material will tear before the seam will give way.

7. Among the array of Patent Sewing Machines, there are none so cheap and dorable as Raymond's Patent, but no Machine is adapted to all kinds of work as experience has proven. There are perhaps none so realy useful, doing such a variety wore for the immediate use of the family circle, and at such a moderate price as RAY MOND'S PATENT.

8. The operator can shape his seam just as he pleases, waves, leaves and flowers, eic., can be represented or imitated.

. It is particularly adapted to all kinds of stitching-such as gentlemen's shirts, bosoms, ristbands, collars, etc.,-and all kinds of ladies' sewing, including silks, lawns, delaines, calicoes, dusters, etc., excepting for men'sbeavy wear, this Machine s rather too light of construction.

10. But we all admit, that the advantage to health, and principally to the vision or eyesight, induced by the use of Sewing Machines, surpasses infinitely all other advantages

11. This Machine fastens the seam always itself, but if the operator wishes it untastened or open, there is a way lor it too, thus you can have it fastened or not. as you please, which is, sometimes, espeher theme, and she carries the interest of cially for beginners, a very favorable cirthe reader along with her, as she, in her comstance.
