McDowell's Report.

In looking over the report, made by General McDowell, of the late Bull Run battle, we discover that the General makes out the Federal loss only about 1400 killed, wounded and missing. The Confederates 2700 wounded. These reports have been slow about coming before the public, and we doubt much whether an official rejot can be taken as a truly correct one. So far as relates to the loss of life we do not see why it should not, but there are so many other things to give an account of that it would be almost an impossibility to come near a true account. The loss of arms, ammunition, provisions, horses, wagons, &c., must have been great in this battle. We recollect of there being quite an amount of grain lost, which fell into the rebel hands, but the number of bushels we are not able at present to give. The rebels no doubt

The important fact that the awful consequences of self-abuse may be effectually removed without internal medicines or the dangerous applications of caustics, instruments, medicated bougies, and other empirical devises, is here clearly demonstrated, and the entirely new and highly succassful treatment, as adopted by the celebrated author fully explained, by means of which every one is enabled to cure himself perfectly, and at the least possible cost, thereby avoiding all the advertised nostrums of the day. This lecture will prove a boon to thousands and thousands.
