### RAYMOND'S FAMILY SEWING MACHINE! PATENTED MARCH 9, 1858.

### PRICE \$10 EACH. MESSRS. ZUPPINGER & ROBBINS, of

Bloomsburg, having purchased the exclusive right of the above valuable Impro ved Chear Patent Sewing Machine, for the County of Columbia, will be happy to supply their friends with the article for the accommodation of themselves and families. The following are some of the superior advantages this implement possesses, viz : 1. It sews from 400 to 600 tight stitches

et minute. 2. Double thread Machines are from the more complicated character of their mech-

anism invariably managed and threaded with more or less difficulty; not so with RAYMOND'S, a child can manage it in two hours, and it is threaded easier than a common needle. 3. One of the most valuable features of

this Machine, is the smallness and the compactness of its mechanism.

4. I' can be attached to a hoard, table or siand, in operating order, and removed in less than half a minute.

5. It greatly economizes the thread, and yet produces a seam, sufficiently strong for any work for which it is intended, a qualification not known to all kinds of Sewing Machines.

6. No human hand is capable of producing a seam so regular and systematic .--The seam is so strong if well done, that the strongest material will tear before the

seam will give way. 7. Among the array of Patent Sewing Machines, there are none so cheap and durable as Raymond's Patent, but no Machine is adapted to all kinds of work as experience has proven. There are perhaps rates to Niagara Falls, Buffalo, Detroit,' none so realy useful, doing such a variety of wore for the immediate use of the family circle, and at such a moderate price as

8. The operator can shape his seam just as he pleases, waves, leaves and flowers, etc., can be represented or imitated.

9. It is particularly adapted to all kinds of stitching-such as gentlemen's shirts, bosoms, ristbands, collars, etc.,-and all kinds of ladies' sewing, including silks, lawns, delaines, calicoes, dusters, etc., ex-cepting for men'sheavy wear, this Machine is rather too light of construction.

10. But we all admit, that the advantage to health, and principally to the vision or eyesight, induced by the use of Sewing Machines, surpasses infinitely all other advantages.

11. This Machine fastens the seam always itself, but if the operator wishes it unfastened or open, there is a way for it too, thus you can have it fastened or not, as you please, which is, sometimes, especially for beginners, a very favorable circomstance. If the seam is left unfastened, you can draw it out in three seconds and save the thread.

For sale by the undersigned, at their respective residences, in Bloomsburg, who will put the Machine in operation and give all necessary instruction.
