DENTISTRY.

seam will give way. 7. Among the array of Patent Sewing Machines, there are none so cheap and durable as Raymond's Patent, but no Machine is adapted to all kinds of work as experience has proven. There are perhaps none so realy useful, doing such a variety of wore for the immediate use of the lamily circle, and at such a moderate price as RAYMOND'S PATENT.

8. The operator can shape his seam just as he pleases, waves, leaves and flowers, etc., can be represented or imitated.

9. It is particularly adapted to all kinds of stitching-such as gentlemen's shirts, bosoms, ristbands, collars, etc.,-and all kinds of ladies' sewing, including silks, lawns, delaines, calicoes, dusters, etc., excepting for men's beavy wear, this Machine

is rather too light of construction. 10. But we all admit, that the advantage to health, and principally to the vision or eyesight, induced by the use of Sewing Machines, surpasses infinitely all other advantages.

11. This Machine fastens the seam always itself, but if the operator wishes it unlastened or open, there is a way lor it too, thus you can have it fastened or not, as you please, which is, sometimes, especially for beginners, a very favorable circumstance. If the seam is left unfastened, you can draw it out in three seconds and | ed with the choicest liquors.

For sale by the undersigned, at their re-
