Prospectus. The Democracy of the North will commit a fatal error if they accept the result of he late Presidential election as an indicatheir political action until the opening o the next campaign. The future welfare o the republic depends upon the politica zeal and activity of the Democracy during

The New York News needs no testimony beyond its plain unalterable record to sub stantiate its claim to being and having been the most earnest, able and consistent States' Rights Journal in the land. We have no excuses to invent for modifications of sentiment, nor have we to plead "expediency" in palliation of inconsistency. Our path has been straight forward. IRON IN THE BLOOD. It is well known to the medical profession that Iron is the vital Principle or Life Element of the blood. This is derived chiefly from the food we eat; but if the focd is not properly digested, or if, from any cause whatever, the necessary quantity of iron is not taken into the circulation or becomes reduced, the whole system suffers. The bad blood will irritate the heart. will clog up the lungs, will stupely the brain, will obstruct the liver, and will send its disease producing elements to all part of the system, and every one will suffer in whatever organ may be predisposed to disease.
