THE YOUNG FARMER'S SONG.

I have no sparkling gems, love,
To bind around thy brow,
I cannot bid my heart to thine
In a golden channel flow;
And didst thou ask for those, love,
How bitter were my part,
For the only wealth my heart can boast
Is a true and loving heart.

A true and loving heart, love,
I know 'tis little worth,
For men forget that hearts in heaven
Are as jewels on the earth;
But still 'tis all I have, love,
And thou dost ask no more,
For having this, what'er thy wish—
Thou knowest I am not poor.
Thou knowest I am not poor, love,
Thou knowest I am not poor, love,
I fight the daily fight of man,
With the stern rebellious soil;
And as I sow, I reap, love,
My joy and equal part—
And though I have not gold or gems,
I've a true and loving heart.

From the American Farmer.

TIME TO CUT WHEAT.

The proper time to cut it, when the stem just below the head, becomes dry, and the progress of nutritive supply from the roots are thereby cut off. By waiting until the entire stem is dry, great losses are sustained from shattering, while, on the other hand, no advantage is to be derived to the kernels. That this is the case, is so obvious, that we need scarcely illustrate it by argument, and will content ourselves by remarking, that when the extremity of the stem becomes arid, that the circulation from below is arrested in its course, and the process of nutrition cannot be carried on, as at that point, the conduit is literally cut off. It is worthy of an observation, that wheat, when cut before it becomes dead ripe, yields a heavier grain and whiter and more productive flour than when harvested at a later period. What we mean by more productive flour, is this, that it will take more water, and consequently make more bread. By cutting wheat at the period we have named, the straw is infinitely better adapted to the purpose of feeding, much of its nutritive properties being retained, which, when cut at a later period, would be lost by evaporation.

We would iterate our advice that all possible care be taken to protect the grain and straw, after it is down, from the influence of the weather, as we know from experience that neglect at this period is calculated to impair the slightly appearance, as well as the market value of the grain. In stacking let the utmost care be taken to exclude the possibility of injury from the rain, and to ensure that, each stack should be capped, so as to turn the rain. And we would here remark, that, while every operation of the harvest is going on, the master's presence is indispensably necessary—that, though he may not labor himself, his presence will tend to make his hands do their work in the way that it should be done. The best of hands, if not closely superintended by those whose interest is at stake, will, without intending it, slight their work, and inflict injuries without designing them. Unfortunately it is the nature of most men to act thus, and although we would not punish a natural fault, we certainly would not act as to ensure against it. Bear in mind that he who encounters the toil and expense necessary to make a crop, rests under a high moral obligation to preserve it from going to waste.

HAVING succeeded in shipping the Mexican Armies at Vera Cruz and Buena Vista, and now designing to march against the city of Mexico to meet the enemy under the walls of their own Capital, the subscriber would imitate their example by waging war against Rags and Nakedness, and he has accordingly recently visited the city of Philadelphia for the purpose of purchasing a stock of

PROTECTION AGAINST LOSS BY FIRE.

THE "Camden Valley Mutual Protection Company," being incorporated by an Act of the Legislature, and fully organized and in operation under the direction of the following Board of Managers, viz: T. C. Miller, James Weakly, D. W. M'Callough, A. G. Miller, T. A. M'Kiney, Philip Spangler, Samuel Galbraith, Samuel Huston, J. T. King, (Adams,) John Zug, Samuel Huston, J. T. King, J. Bear—call the attention of the inhabitants of Cumberland and Adams counties to the cheapness of the rates, and the many advantages which this kind of insurance has over any other.

1st. Every person insured becomes a member of the company and takes part in the selection of officers under the direction of the Board.

2d. For insurance no more is concerned than necessary to meet the expenses of the Company, and indemnity against losses which may happen.

3d. The inconvenience of frequent renewals is avoided by insuring for a term of five years.

4th. Any person applying for insurance must give his premium note for the cheapest class at the rate of five per cent, which will be \$50 on the \$1000, for which he will have to pay \$30 for five years and \$150 for surety and policy, and no more unless loss is sustained to a greater amount than the funds on hand will cover, and then no more than a pro rata share. These rates are moderate, and will be paid in full at the expiration of five years, as are incorporated on the same principles.

THE AMERICAN REMEDY.

THOMPSON'S COMPOUND SYRUP OF TAR AND WOOD NAPHTHA.

OF all the remedies ever discovered, in late years, for the cure of CONSUMPTION, Coughs, Colds, Asthma, Bronchitis, Liver Complaint, Spitting Blood, Difficulty of Breathing, Pain in the Side and Breast, Laceration of the Heart, Inflammation of the Lungs, Constipation, Sore Throat, Nervous Debility, and all diseases of the Throat, Breast and Lungs.

None has been found more CERTAIN and PERMANENT in its curative power over these, so general and often fatal diseases, than the above preparation. The Compound Syrup of Tar and Wood Naphtha is an unparalleled Remedy. In addition to the healing power of Tar—the virtues of which in affections of the lungs, is universally acknowledged—there is combined with it in this preparation the active principles of some of the most certain Tonic and Vegetable Pectorals, which unite to the public for the cure of the diseases for which it is employed, so that it never fails, if taken in time, to produce the intended effect.

Among the testimonials to the value of the above medicine, are several from distinguished physicians of Philadelphia. Read the following from Dr. Young, the eminent oculist:

Philadelphia, Jan. 18, 1847.

Having used in my practice, as well as in my own family, Thompson's Compound Syrup of Tar and Wood Naphtha, I have no hesitation in saying that it is the best preparation of the kind in use for persons suffering from Consumption, Coughs, Colds, and all affections of the Throat, Breast, &c. so prevalent at this season of the year.

WM. YOUNG, M. D.

Read also the following from a man who will at any time corroborate the above statement:

MOST WONDERFUL CURE.

Philadelphia, Dec. 4, 1847.

Penetrated with a deep sense of gratitude for the benefit experienced by the use of Thompson's Compound Syrup of Tar and Wood Naphtha, which, after I like me, have languished through years of affliction and suffering, without being able to find a remedy may know where it can be obtained, I voluntarily make the following statement:

About four years since I was being affected with a violent cold, it left upon me a troublesome and severe cough. Whilst the cough continued, which was with scarcely an intermission during this long period, language fails to tell what I have suffered from the disease. My system became exhausted, night sweats, difficult expectoration, oppressed breathing, and in fact all those symptoms which mark a severe pulmonary affection. The relief occasionally obtained by the discharge of the matter which obstructed the action of my system, but increased my fears, as the purulent matter discharged was frequently streaked with blood.

During this time I was under the treatment of several physicians, and took many of those preparations recommended as serviceable in the cases of others, but without relief—and at length concluded that a cure in my case was hopeless. But long ago I changed my mind, and purchased a bottle of Thompson's Compound Syrup of Tar. By the use of one bottle my cough has been relieved and my system reinvigorated, and by continuing the use of it up to this time, I am satisfied that my complaint is entirely removed and eradicated.

DR. M'LANE'S LIVER PILLS.

For the cure of **Hypatites or Liver Complaint, Dropsy and Sick Head-Ache.**

THIS remedy has been for several years employed by the proprietor in Great Britain, and very large scale in Monongalia, Preston, Harrison, and Randolph counties, in Virginia, besides several other places, and having been attended with the most happy effects, he has been from time to time solicited to take such a course was not to be more an extensive circulation with a view to lessen the amount of human suffering. Aware of the fact that many nostrums have been palmed upon the public, he hesitated for several years, until thoroughly convinced that the above medicine, if properly used, would not fail to effect cures in great many instances, and even to alleviate those cases which are quite incurable.

Symptoms of a diseased Liver.—Pain in the right side, under the edge of the ribs, increased on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder-blade, it frequently extends to the top of the shoulder, and is sometimes mistaken for a rheumatism in the right arm. The stomach is affected with loss of appetite and sickness; the bowels, in general, are constipated, sometimes alternating with lax, the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled, his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise would be beneficial to him, he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease, but cases have occurred where few of them existed, yet examination of the body afterwards has shown the liver to have been extensively diseased.
