In order to produce a machine that will meet the wants of the community in every respect, the Patentee has for several years applied himself diligently to the task, and is now enabled to offer a machine worthy of their consideration. This machine has only been in operation during the last season, in Cumberland, York and Adams counties, and has given entire satisfaction. It is a nest, portable machine, only weighing about 400 lbs. and of light draught, and can hull and clean with case four loads of cloverseed per day, or one load in two hours. It can be con-

verted into a common windmill in a moment's time. Persons desiring to purchase rights can see the machine, by calling at my residence in Latimore township, Adams county. Owners of Clover-mill would find it to their advantage to give me

a call. Hundreds of certificates can be given of its utility, and the satisfactory manner that it hulls and cleans cloverseed, and also timothy seed, but I doem it only need ry to refer to a few individuals at when barns the machine has been exhibited and fully tested.
