

MAGRICULTURAL.

HOW TO RAISE WHEAT. Ire Hopkins, in the Albany Cultivator, thill tells his brother farmers how to raise thiffy bushels of wheat per acre, where they equid not raise twenty before :

"Where you have a good clover sod, let the clover grow until the first week in June; then take a good team and plow, seed down flat, and let it lay eight or ten days; then take a light harrow or cultivatorpand bulverize the ground fine, and aboth 25th of June sow two and a half bushels of corn to the acre, and after harrowing it well, roll it down smooth. About the last week in August, take your roller and prese the corn down as flat as possible, going found with the roller the same way you intend to plow the land; then plow the land, as deep as possible, and turn all the corn under; follow with the roller, pressing all down flat. Thus you have two crops well mixed with soil for ma-

Then take a light harrow or cultivator, and pulverize the ground fine, and sow the wheat about the middle of September; and if you do not have one-third more wheat than you do where you summer fallow. tell nie Lam mistaken in a cheap method plant down, and leave the ground clean, corn scratched up with the harrow, it will afford argood top dressing for the wheat."

FATTENING CATTLE.—There is disquestionably a great difference in the capacity shortes notices. of the different kinds of food to form flesh or fit. . Am estimate which we met with, based pu the Report of the Commissioner of Butents, represents that beans contain ment of the flesh-forming principle, and corn nearly she deant . It is well known. however, that the latter article is the best

griffer are chosen to prepare it for the by note or book account, will be expected knie. Corn contains about hime per cent? of oil, which is greater than any other intrigious grain. Hogs which feed on nuts fatten fagter, than on any other substance. though, as all know, their fat is less firm the Cash will be required. than that of corn-fed hogs.

The Suil-Flowerseed is thought by some to be entirely free from the latter objection, while it is better than the cereal grains, fornishing forty per cent. of oil.

The ludicious farmer, by mixing the different kinds of food, intended, for stock, will be able to produce very much such results as he may desire.

Most judicious writers on fattening stock recommend cooking and formenting food, before giving it. It is generally conceder that their one quarter is saved.

Animals undergoing the fattening pro cess, should be kept warm and quiet, and sudden transitions of temperature avoided.

THE FERTILIZING EFFECTS OF SHADE on Manbur. - It is a well known fact that the earth is capable of being converted into the best manure. If densely shaded, it will undergo chimical changes, apparently similar to those which vegetable and animai matters do when they are converted into manure; namely, it is changed in color, consistence, and fertilizing qualities .-This fertilized earth is known as yegetable mould, or virgin earth, to be the best of all inshures. It has hitherto been considend the residue of vegetable decomposition. Vegetable matters upon the earth's surface, exposed to a free circulation of air, spires to be decomposed by a different chimiral process, termed mouldering, which forms a triffing carbonized residue destitute of fertilizing qualities. And this is the case also when plowed under and deprived of contact with the atmosphere. Unless they be previouly saturated with water, or lime be added, they do not underge fermentation, but, by mouldering, become useless, if not pernicious, to after ve-

The astonishing fertilizing effect of vegetable matters, when thickly covering the surface of the earth for a length of time, cannut be accounted for by their decomposition, for the quantity, of the residue of claver, leaves or straw, would not be sufficient, even if it were always equal in virtue to the best Peruvian guano. Straw spread thickly upon the poorest land-"land completely exhausted of alkalies"will enrich it by the time it is decomposed; ten times the quantity plowed under will produce no perceptible benefit. If the minure of atrum be owing to the six per cent. of phosphate of lime which it contains, why is it that sixty per cent. placed in the earth imparts no tertility to it !-That the fertility of the earth is not attributable to the decomposition of the straw, is proved by the fact, that any substance incapable of decomposition will produce precisely the same effect. The wonderful fertilizing effect of all substances covering the surface of the earth for some time, is to be attributed to shade, and shade only; and that the degree of fertility im-Paried to the soil may always be estimated by the density and duration of the shade. That balle is a most powerful and efficient Paper, Envelopes, Motto Wafers, Fancy agent, is exemplified by the rapid destruc- Scaling Wax, Letter Stamps, &c., for safe the at the timbers and floors of buildings by which cellars, when the precaution of SCHOOL BOOKS AND STATIONproperties, semilation beneath has been and for sale, at the lowest prices, which should be the farmer to the flightness the annual stationery. Dr. Drake's Panacea, The only radical cure for Consumplich all diseases arising from an impare side b G. E. BUEHLER

ESPECTFULLY informs his friends and the public generally that he has ow on hand a large assortment of TIN assort Eyes. Change of Lumbago, diseases arising from an injud cious use of Mercury, Dropsy, Exposura of Inthis medicine several innocent but very nothe blood-viz.; Scrotula or King's Evil, Bbeu

will sell at moderate prices—all warranted. In this med cine several innocent but very potent within med cine several innocent but very potent articles of the vegetable kingdom are united, forming a compound entirely different to its char-aster and properties from any other preparation, and untivalled in its operation on the system and untivalled in its operation on the system when laboring under diaease. It should be in the hands of every person, who, by business, or general course of life, is predisposed to the very many aliments that tender life a curse, instead of a blessing, and so often result in death.

FOR SCRGFULA, Dr. Drake's Panacea is re-

commended as a certain cure. Not one instance of its failure has ever occurred when freely used It cores the disease and at the same time imparts vigor to the whole system. Scretulous persons can never pay too much attention to the state of their blood. Its purification should be their first aim; for perseverence will accomplish a cure of even hereditary disease. ren hereditary disease.
FOR ERUPTIONS OF THE SKIN, Scurvy. Scorbutic Alfactions, Tumors, White Swelling, Erysipelas, Ulcers, Cancers, Running Sores, Sciaba and Biles, Dr. Druke's Panaces cannot be too high-

ly extolled; it searches out the very root of lisease, and by removing it from a system, makes a cure certain and permanent.
INDIGESTION.—No medicine perhaps, has ever been discovered which gives so much lone the stomach and causes the secretion of healthy gastrie juice to decompose the food as Dr

Drake's Punncen.
RHEUEATISM.—Dr. Druke's Panacen is used with the greatest success in Rheumatic Com-plaints, especially such as are chionic. It curs by driving out all impurities and foul human's which have accumulated in the system, which are the cause of Rheumatism. Cont. and Swellings of the joints. Other remedies semetimes give temporary relief; this entirely eradicates the dis ease from the system, even when the limbs and

bones are dreadfully swollen. CONSUMPTION can be cured. Coughs, Ca turh, Bronchitis, Spitting of Blood. Astl ne, Difhealt or profuse Expectoration. Beetic Phich, Night Sweats. Pain in the side, &c., have been other simple disease. A specific has long been sought for but in sain until the discovery of Dr. Drake's Panacea. It is mild and onle but certain and efficacions in its operation, and camput possieither these things are so or not. Let them paire among their friends and ask the same bly injure the most delicate constitution. We estion. Verily if EVIDENCE is wanted it would earnestly recommend those affected to give all be procured. To the sick, let me say, use it a trial—and we believe they will not have occasion to regret it. The system is released and strongthened the above the large of the large Man will be born to days of this, compared strengthened, the ulcers on the lungs are hented, and the patients gradually regain their usung health and strength. Read the following testimony.

Philadelphia, Ddc. 14th, 1817.

Press Sin :-- in teply to your question re-pecting the use of Dr. Diake's Panacea. I will sny, that although a perfect disbeliever in the existence of a Panaren, or cure for all diseases, however valand other coutries, and having lately pro is removed by perseverence without the aid of a cured from Europe a great variety of new physician. Adapted to all circumstances and too, still I have believed that a cure for Con uable it may be in certain conditions of the sys sumption would be discovered somer or later, and curiosity led me to try your medicine in two very inveterate cases. They were prenounced by the attending physicians to be PULNONARY CRESTAR-Ties, and abandoned by them as incurable. One N. B. There is no surety that you get the of the persons had been under the treatment of or the persons and orea under the a number of several very able practitioners for a number of years, and they said she had said furking the temption combined with Scrafula, and that also per box at Dr. B. Beandreth's Principal Office, 241 | might linger for sometime, but could not be per manently relieved. In both cases the effect of the Panacea has been most gratifying. Only ions or five bottles were used by one of the persons before she began to improve rapidly. The other trok she began to improve rapidly. The piber tenk about ten. I will only add that familiar as I am with consumption by inheritance and by exten-sive observation as a study, and knowing also the chanicsville; Sam'l Shirk Han-fonceset, and other vegetable tenics as well as of many of the expectorants and sedatives. I should never have recommended it e use of I r. Drake's Panacea if I had not been acquainted with the ingredients. Suffice it to say that the are recommended by our most popular and scien-ific physicians, and in their present combined state form probably the best alterative that has
