Mr. Dalley—Dear Sir.—While, my son, 13

years of age, was at work in the shingler man factory of L. P. Rose, he had the mistorouse slip and fall into a a large vat, used for the pur-pose of boiling blocks preparatory to cutting.— The blocks had just been removed from the vat containing a large quantity of boiling water.— He fell torward, scalding both hands and arm all on one side, and one leg badly and the other partially. The scales were so had on his arms and leg, that most of the flesh came off with his garments, and his life was despaired of by both his phenicians and follows.

Dalley's Pain Entractor was procured as soon as possible (which was in about aix hours) and applied, and which relieved him from all pain. It Morness and Nuners knew its value in cases of "swollan" or Sore Breast, they would not
be without it. In such cases, if freely used, according to the directions around each box, it

We continued the use of the above medicine about two months, and we believe it was the means, under Pravidence, of saving his life, and we would cheerfully recommend it in all simila

I perseived that my pulse was much mere rapid than com-mon. Sometimes I was tormented by immedmon. commitmee I was formenica by immon-erate thirst, and, occasionally, a strong inelfac-tion to vomit, without being able to raise any-thing. I found no difficulty, however, in exting, although it seemed, after all, to do me no good. My strength failed me very fast, and my stools were invariably accompanied by discharges of were invariantly accompanied by discharges of blood. The complaint proved to be dysentery of the very worst type. One recommended me to call in a physician; another, to try Lee's Pills; while a third advised me to try something else: I chose; however, to preseribe for myself. I had heard a great deal about the virtues of your Sugar Coated Vegetable Pills from several of my neighbors; and therefore concluded, if they had cured others, there was no reason why they should not cure me. A dose or two soon convinced me that my conclusion was correct. I found the mildness of their operations particularly adapted to complaints of this pa ture. The change in my feelings was gradual, out none the less certain. The symptoms began jo shee after the second or third dose. My strength returned; and the third or fourth box found me restored to my accustomed health,

which has always been remarkably good.
