FIRE constant, unsolicited application for Life Insurance, furnish the most abundant and gratifying proof, that the public mind is deeply impressed with the vastimportance of this subject. The great | go through all the ramifications of the object, however, of insurance, should be safety; otherwise the whole motive to insure may be disappointed. Too much care cannot be practiced in the selection of an office, with which to effect the contract. The choice should be regulated, not by present and constant large inducements, as this is certainly incompatible with future benefits. The premiums on life are calculated for the future. If present and propective benefits, therefore, are given, the result, ultimately, must terminate in litigation, disappointment and ruin. The object aimed at in this institution is stability and perpetuity. The rates of premium have been carefully propared with reference to fluctuations. The cash system has also been adopted. Unpaid premium notes constitute no part of the assets of this Company, and every contingency being fortified with an ample capital, security stamps the whole system. This featere, paramount to all other considerations, ends the company to public favor.

Explanatory pamphlets, blanks, appli cation papers, information, and every fa cility, will be cheerfully furnished by D. MCONAUGHY, Esq., who has been appointed agent of the company.

Mr. Buswell, Dear Sir: Having used a coneiderable quantity of your Mineral Paint, in painting
brick and wooden houses, the past season, I have
taken extra pains to try and test it in various
ways, from its trial and composition P can wire
rant it to be durable both in quality and cofor;
it mises beautifully with, oil—paints very easy—
and for ship or boat painting, I think their has no
bettter paint ever been introduced. I have seed considerable of it with water and give composi-tion, for coarse, cherp painting, and it exceeds any thing I ever saw. Truly Youta
