From the Plough, the Loom, and the Anvil. PLOUGH DEEP.

BY WH. OLAND BOURNE

Ho! Yeoman ! turning up the sod ! Thrust with your might the sharpened blade Turn up, turn up the heavy clod, ind the treasures underlaid ! Bring to the genial heat of noon The richer soil to catch the rays I Plough deep ! Plough deep !

Give to thy sinewy arm the will-Give to thy toiling hand the might-Wealth buried deep shall come to fill The hands of him who toils aright. Turn up, turn up the under soil ; Turn to the light, the air, the sky ;

large reward repays his toil Who delveth deep where treasures lie ! Plough deep ! Plough deep ! Ho ! Delver in the boundless field Where truth lies waiting to be won ! Not priceless treasures will she yield, While yet the task is just begun. Turn up, turn up, with patient hand, The deeper soil that hides the gold, And rubies with the glittering sand

Thy longing eyes shall soon behold. Plough deep ! Plough deep ! Ho! Battler with the old time wrongs ! Ho! Laborer for the rights of Man ! Cheer your bold hearts with bolder songs. And toil for freedom while you can. Turn up, turn up, beneath the walls, Foundations laying broad and deep, Till dome with pillar prostrate falls,

In dust and ruin long to sleep. Plough deep ! Plough deep ! Ho! Toller in our mighty age ! Before thee lies the open plain, In whose great strife thou canst engage.

Furn up, turn up the pregnant earth It waits to win the riper seeds; They shall, in Heaven's own time, give birth To glorious and immortal deeds ! Plough deep ! Plough deep !

Honoring Parents. As a stranger went into the churchyard of a pretty village, he beheld three children at a newly made grave. A boy about ten apron a few roots of wild flowers. The prising; and they ascend with ease heights

Drunkenness and Death.

The horrible death of Capt. John Bun-

with the farm servants in the mountainous !

parts, to strew a pinch of arsenic on the

road. This is done for years without the

ARSENIC EATERS. A trial for murder took place lately in Austria, in which the prisoner, Anna Alexander, was acquitted by the jury, who, in the questions put to the witnesses, in order to ascertain whether the murdered man, Lieutenant Mathew Wurzel, was a a poison-cater or not, educed some curious evidence relating to this class of persons. As it is not generally known that eating poison is actually practised in more countries than one, the following account of the

custom, given by a physician, Dr. T. von Tshudi, will not be without interest. In some districts of Lower Austria and in Styria, especially in those mountainous parts bordering on Hungary, there prevails the habit of cating arsenic. The peasan try in particular are given to it. They obtain it under the name of hedri from the travelling hucksters and gatherers of

herbs, who, on their side, get it from the glass-blowers, or purchase it from the cow doctors, quacks or montebanks. The poison-eaters have a two fold aim in their , enjoyment; one to obtain a fresh, healthy, appearance, and acquire a certain degree of embonpoint. The number of deaths in consequence of this immoderate

especially among the young. Every priest who has the cure of souls in these districts where the abuse prevails, could tell of such tragedies ; and the enquiries made by Dr.

the movements of the other two. They poison-caters begin, consists, according to eral mornings in the week, they confine voce:

themselves for a considerable time; and wild nowers around the head of the grave, then gradually, and very carefully, increase the dose according to the effect produced. A strong, hale man, upwards of sixty, takes at present at a dose a piece of about the

weight of four grains. For more than forty years he has practised this habit, which these flowers around your mother's grave ?" he inherited from his father, and which he "No, sir, father lies here too, and little in his turn will bequeath to his children.

The bird must have discovered charm on the vines, and it was never my that he could not apply his beak with suffortune to raise such a fine crop of melons ficient force to break the shell when it was rolling about, and he therefore found and made use of a spot which would keep the

shell in one position. When the lapwing wants to procure food. it seeks for a worm's cast, or hole, and larmed at the slaking, of the ground, endeavors to make its escape, when it is im-

The lapwing frequents the haunts of worms, on which it feeds, and frightens them until they come to the surface of the ground, where they are seized by the lapwing. The same mode of alarming Jes-

A LESSON IN ARITHMETIC. --- Teacher Suppose I was to shoot at a tree with five birds on it, and kill three, how many would there be left ?

John-Three, sir. Teacher-No, two would be left, you ignoramus.

John-No, there wouldn't; the three birds would be left, and the ether two would be flied away.

"It's a sure sign of weekness where so many hoops are used," said a cooper, on seeing a profusion of rings on a man's fin-

"Mr. Brown, I owe you a grudge, re-member that.". "I shall not be frightened then, for I never knew yos to pay any-

In a town of Connecticut, a loafer was trunk, and finely powdered charcoal ap-

brought before a justice for being drunk in the street-the fine being one dollar for each offence. The fine he paid, and was the gum.

kissing were a substitute for mutton chops,

of the church approaching the door. She "Dear me," exclaimed the lady, "there

goes the bed cord; it snapped yesterday lambs. just the same way. I must have a new one provided."

In a few minutes pop ! went another, accompanied by the peculiar hiss of the escaping liquor. 'The 'rope' wouldn't do
