Baths! Baths!!

NOW OPEN FOR LADIES AND GENTLEMEN.

THE subscriber, at the solicitation of numerous persons, will put up a BATHING ESTABLISHMENT, at considerable expense, for the accommodation of the citizens of Gettysburg. It is located near the residence of the subscriber, on South Baltimore street, in a retired and convenient place. It consists of both a PLUNGE and SHOWER BATH, which will always be kept in good order. The baths are now ready for use, and will be open to subscribers on the following conditions:

1. Any person leaving his name with the subscriber, and paying \$1 in advance, will have the privilege of the baths for the entire season. Persons who have not thus subscribed, will be required to pay \$1 cts. for each bathing. No subscriber to have the privilege of bathing more than twice a day without extra charge.

2. The baths will be open every day between the hours of 6 and 9 A. M., for the use of the Ladies exclusively. All the other hours of the day, they will be open for Gentlemen, until 10 o'clock, P. M.

3. No person will be privileged to use the baths on Sunday.

4. No one person shall occupy the bath-house longer than ten minutes at a time; and no three persons longer than 30 minutes; and not more than three persons shall enter at any one time.

5. Good order will be required of persons using the baths; and any misconduct in or about the bath-house will bar the guilty person from further privileges. The company using the baths when any improper or disorderly conduct takes place, will be held responsible therefore until the guilty person is detected.

6. The use of soap in the Plunge Bath is prohibited altogether.

7. The key to the Bath House will be kept at the residence of the subscriber, where it must, in all cases, be returned, after bathing.

Persons wishing to subscribe, or obtain further information, can call upon the subscriber.

MILLS! MILLS! MILLS!

ALL IMPORTANT DISCOVERY.

WAKE TO YOUR INTERESTS.

BONNELL'S

NEW and Improved Patented process of

flowering by which a barrel of superfine flour is constantly made out of 240 pounds of Wheat.

The subscriber having introduced the above process of Flouring into his Mill at Locust Grove, in Germany township, Adams county, finds it all its anticipated, and is now realizing a great profit from it, by constantly making a barrel of superfine flour from 240 pounds of good wheat, on a straight average grind, without stoppage or interruption for re-grinding purposes. This process can be adapted to country work to the same advantage as Merchant work. The Milling community are respectfully invited to call at my Mill, one and a half miles S. West of Littlestown, where they can see the whole process in full operation, witness its simplicity and perfection, find that it works to admiration, and no mistake. The undersigned has procured the right, and is now prepared to sell County, township and individual rights in the following Territory:

Adams, York, Cumberland, Dauphin, York, Lebanon, Chester, Berks, and Lancaster County and City, in Pennsylvania, and Allegheny, Washington and Frederick, Carroll, Howard, Anne Arundel, and Baltimore County and City in Maryland.

This process has been introduced, and is now in use in many of the most extensive Flouring Mills in Western New York, Michigan and Ohio, all of which are making a barrel of superfine flour from 240 pounds of wheat upon a straight average grind. For further particulars refer to hand-bills, put up in the Hotels in Gettysburg, Adams county, and in the County, containing a number of Certificates, &c., from practical operators, men of the first standing. All the necessary information, together with a draft of the bolting arrangements, hopper, plan of feeding, &c., &c., will be given to any individual purchasing a right. Any further information can be obtained by calling on the subscriber, or by letter, (post paid) to him at Gettysburg.

Gettysburg, April 16, 1852—f.

In a letter from Mr. A. L. Spalding of the State of New York to the undersigned, dated October 10th 1851, he says:—

"I have Bonnell's process of flouring in my mill, it is right—4 bushels of good wheat weighing 60 pounds to the bushel is enough for a barrel of superfine flour; if you think it an object to gain from 15 to 25 pounds of wheat in every barrel of flour, come and see my arrangements. I am making the mill daily. I will never go back to the old method. I have had 23 years experience in the business, and it is worth all other improvements."

G. A. P. S. Mr. Spalding is a large operator, grinding upwards of 30,000 barrels of flour per year.

IMPORTANT TO FARMERS.

A barrel of superfine flour out of 240 pounds of wheat—and no mistake!

GEORGE ARNOLD

HAS introduced into his Mill at Locust Grove, Germany township, BONNELL'S PATENT PROCESS OF FLOURING, and is now making a barrel of superfine flour from 240 pounds, or four bushels of clean wheat weighing 60 pounds. This brings a gain to the farmer of from \$1 to \$1 1/2 bushel of wheat to the barrel over the ordinary process of grinding; there is also a gain in the output, in there being more shorts and shippings and little or no bran. This improvement consists of one continuous process of grinding, bolting &c., until all the flour is obtained, separating the starch from the glutinous substance contained in the grain, and by it the quality of the flour is improved, not grinding so close the first grind as to injure the quality of the farina or meal part of the grain, and grinding so close the second grind as to take out all the flour from the portion of the berry which remains in the off with the old method of grinding, and which is the most nutritious part of the flour; this being combined with the whole, improves the quality of the flour, makes it more nutritious, will always insure good fermentation in baking, rises better, is not so liable to sour, will make a better yield of bread to a given quantity of flour, as white, and sweeter than flour ground in the old way, preserving all the good qualities of the flour.

Farmers wanting a barrel of superfine flour made from 240 pounds of good clean wheat, will please call at Locust Grove, JOHN CRABBS, Miller, Locust Grove, April 16, 1852—f.

Great Labor Saving Invention.

D. P. BONNELL'S Patented Process of Flouring, BY which a barrel of superfine flour is constantly made out of 240 pounds of wheat. It not only economizes, but is a great labor saving invention in a Mill.

With this arrangement as now introduced in Mr. George Arnold's Mill, at Locust Grove, one hand is enabled with ease to manufacture and send off 40 barrels of flour per day, saving the expense of one hand in the Mill. It is not liable to get out of order, and besides the great gain in yield, comes as near entirely doing away manual labor in the Mill as is possible, leaving for the Miller little else to do than overlook the machinery and see that all works well.

Millers and others are invited to call and witness its operation.

JOHN CRABBS, Miller, Locust Grove, May 25, 1852—f.

ICE CREAM, MEAD, AND CONFECTIONARIES.

THE subscriber has now commenced operations for the summer, at the old stand in Baltimore street, and is prepared to fill all orders for any quantities whatever at the shortest notice. Thankful for past favors he feels confident in his ability to furnish his patrons with an article of pure cream, unsurpassed for flavor, smoothness and richness. My rooms are now open for the cool and agreeable confection, in all its variety of flavors; also good Mead of the very best quality. No pains or expense will be spared to make the calls of visitors agreeable and pleasant.

E. SHEADS, April 23—8m.

MURDER

As a most revolting crime, and as Court is near at hand some of our citizens will be called upon to discharge high and responsible duties as judges of every man's conduct that may be presented before them. As their verdict will necessarily be final, it should be based upon truth, justice and fact. So should our verdicts always be based, whether in matters concerning life, liberty, or property, or in matters of honor. Every father, mother, son, and daughter is interested where they are to be the best advantage; and we therefore say to them, that it is for their interest to call and examine

SAMSON'S Ready-made Clothing and Variety Store,

in Gettysburg, where Goods are sold cheaper than at any other establishment—notwithstanding all the talk of others about "cheaper than the cheapest"—30 per cent cheaper, &c. If you doubt this—or that it is a hollow competition either in Gettysburg or elsewhere—just give him a call and satisfy yourself.

There are those, who, prompted by selfish motives, sometimes decay Ready-made Clothing, as being defective, and made out of cheap materials. This may do to blind the unthinking, but not those who will take the trouble to examine my large assortment of goods. I invite gentlemen to call and say whether they have not paid as high as \$10 per suit for clothes no better than that in my store, which are made up too by a regular New York tailor. Occasionally an article may prove defective, but where is the merchant that has never sold a piece of cloth, cassimere, calico, or muslin, which did not turn out to be bad. It is impossible to prevent this altogether, even with the best of judges.

Time is said to be money, and money is said to be time. So they are, if properly applied. And herein lies the secret of my ability to sell goods lower than any body else. Instead of turning to the city, and spending a few days in hastily purchasing goods at market prices, I spend as many weeks and even months at other days—thus buying at wholesale, with care, and frequently at almost half the market price. Hence I am enabled to sell the same goods to my customers much lower than others, and frequently one-half lower.

I adopt no two-price system, by which one customer
