POSTSCRIPT.

in a few days; from the simplicity of form and the excellence of the materials used, this bridge will be an item of very little expense for many years to come. The timber for Swift and Brush Runs is already delivered, and it is designed to erect these bridges in a few weeks.

Having viewed each section somewhat in detail, I find, collectively, the amount of read-bod graded to be ten and a half miles one half mile of which is for a double track width; this only requires trimming in the Spring to be ready for the rails. Though you perceive that the larger priphertion of your Road is graded, in point of distance, yet there remains the heaviest portions to be performed; which have been kept with reference to winter operations.

The work under most of the contractors is progressing with considerable rapidity, and the force will be increased from time to time as may be required, to complete the grading and bridging of the whole Road by the 1st of July next, mostly the company require it.

All the Bridge Masonry on the line of road is completed, and nearly all the culvert usessonry, leaving very little to do in that department, excepting a road bridge in New Oxford, and a few open culverts.

The plans and estimates are prepared with a view to a solid and permanent road-way, and of such a character as to need but little

a view to a solid and permanent road-way, and of such a character as to need but little opairs hereafter, in comparison with other touls.

The embankments, with few exceptions, RET HARPER, daughter of Mr. Wm. Har-The embankments, with few exceptions, are composed of such material, that will require less expense to be incurred hereafter by the Company in keeping the track in good order than is usual. The banks are indeed solid, and very little filling up will be required. All the trimming to the graded of the weather. All the weather all the weather all the period of the weather all

TREASURER'S REPORT.

To the President and Directors of the Geltysburg Railro at Company:

The Treasurer presents the following states

The Treasurer present

Do Contractors to 'complete: the grading and bridging by the first of July next, Coefert and a harmonises and faithful acting together is cosentially seece sary.

Respectfully rours,

Respectfully rours,

L. H. M'CLELLAN, Treas.

Engineer's Office, J. New Oxford, Jan. 1, 1857.

To the President and Directors of the Getty-burg and the autronating been located late in the Autumn and Winter of Hosping South are often required in the corrections of the lines of a fastily located survey. These modifications have now all been made and fibroad is believed to have its best position for durability and economy of repair. The connection will the marke as soon as the weather becomes more favorable; the work to be done being solight, thata very short time will be required to get the work to be done being solight, thata very short time will be required for the two two to be done being of the same and the subject in my should be an appeared to the statement from me of the condition and progress of the work at this time.
