Rheumatism

in all of its forms is quickly relieved by medical baths. The crystals of uric acid lodge in the small blood vessels causing congestion with resulting pressure upon the surrounding nerves. This causes the excruciating pains of rheumatism.

SULPHUR VAPOR BATHS

create a better circulation of the blood thus helping to dislodge these crystals which by these baths are eliminated along with other impurities through the pores of the skin.

A few baths a week for several weeks will in a case of long standing bring results; if you do not insist upon doing those things which will cause more rheumatism.

BUSINESS CONDITIONS IN HARRISBURG GOOD

Clearing Association President Says He Is Surprised at Big Increases

Generally good business conditions in this city, better than those in the country at large, are given as the cause for the remarkable increase in bank clearings during the past year by Donald McCormick, president of the Clearing House Association, in an interview with the Telegraph.

Mr. McCormick said he was surprised when he learned that the figures show a steady increase of at least a million dollars every month during the year.

"We have cleared for the Mechanical banks and one of the Duncannon banks since April of last year, but these banks had not total more than a million and a half dollars.

"Other influences that might have had some small bearing on the increase were the consolidation of the trolley lines of the city into the Harrisburg Railway Company, the funds of the State Highway Department, and the fact that the Legislature met here for six months. But these could not have had such an influence as to make a monthly increase of a million dollars and over.

"It is due rather to general business conditions in the city. The mills and shops have been working full time all year until quite recently and trade has been brisk in industrial and mercantile lines.

"Compared with the falling off of national bank clearings in the last three months of the year, this city has had unusually good conditions."

Board of Public Works and Stucker Brothers Differ

Owing to the failure of the Stucker Brothers Contracting Company to replace several concrete steps in the work along the river front as directed by the engineer of the Board of Public Works, within the time limit specified in the notice last week, which expired to-day, a conference between the boardmen of the contractors, the Superintendent of Streets and Public Works, and the members of the Board of Public Works will be held this evening with a view to determining what shall be done.

Instead of replacing the defective steps the contractors have removed their machinery and closed down the work for the winter. It is intimated that the contractors will be relieved of the work inasmuch as there has been constant friction almost from its start.

Interest in Prevention of Cruelty to Animals

Interest taken by the people of the city and county in preventing cruelty to animals has resulted in more voluntary complaints from others than officers and members of the company during the past year than ever in the history of the society. This is shown in the report of the board of managers submitted at the third annual meeting of the society held this afternoon.

The total number of complaints made during the year was 349. Arrests totaled 32 and convictions were 20. This is much larger than any other year. It is due, the board of managers think, to the growing interest of the public and prevention of cruelty and to the education of the general public.
