PUBLIC SENTIMENT SOLUTION TO VICE

turn of the case to court, and must be distinguished from the duties of a constable or policeman whose function of office is the suppression of crime and its detection, when committed. Ordinarily, a district attorney should not be compelled to take the initiative in any prosecution, but when a crime has been committed, the nature of which is so serious and revolting that it shocks the community, or when vice is so open and flagrantly practiced that it brazenly flaunts itself in the eyes of the people to such an extent as to become an intolerable nuisance, violating all sense of decency and propriety, and thereby affecting the public morals, upon failure to

act of those officers who have entrusted to them, in the first instance, the conservation of the peace and good order of the community, he should not hesitate to investigate and determine to prosecute.

Agrees With Dr. Kelly

Did you hear Dr. Kelly's lecture? Yes, I heard a great deal of pleasure and satisfaction in the lecture upon the ills affecting the condition of the public health delivered in this city, a few weeks ago, by Dr. Kelly, under the auspices of the Dauphin County Medical Society, and heartily agree with him in every particular. He made a clear and able diagnosis of the case and forcefully expressed his opinion of the remedy and the manner in which it should be applied.

This remedy, in my opinion, does not mean what is frequently termed a "crusade." Personally, I do not believe in crusades. They are merely spasmodic attempts for the suppression of vice, productive of no permanent good, and frequently without any other result than to give to an ordinarily well regulated and governed community a great deal of undesirable advertisement and an unsavory reputation for vice; a blot upon the fair name of a municipality which frequently requires years to remove.

As in the Beginning
Laws have been violated in the past and will continue to be violated in the future. Sin is inherent to man, and no permanent cure can ever be effected. The only solution to the question lies in the successful maintenance of an active public sentiment that will continually and constantly insist upon the suppression of all manner of vice and immorality, the performance by public officers of the duty imposed upon them and the steady enforcement of the law.

You may also say, that I shall be glad at all times to receive advice and suggestions from all sources, upon any matter having for its purpose the advancement and betterment of the morals of the community.
