It takes a baby a year or more to get six teeth.

In a year or less six of your teeth may be seriously damaged by lack of proper care. Proper care does not mean that you have to spend an hour a day scrubbing your teeth. Just two or three minutes in the morning and two or three at night.

And the care that you give your teeth is an investment that comes back a hundred fold in better health, and a better chance to make your mark in the world.

White Slavery a Myth Declares Col. Hutchison

Colonel Joseph B. Hutchison, chief of police, will take no action for or against the production of the "White Slave" pictures in this city next week. The "Colonel" is not a strong believer in white slave stories. He said this morning: "White slavery is all a myth. In ninety-nine cases out of a hundred, girls pictured as white slaves lead the lives they do because they like that sort of a life. Taking one inmate of a disorderly house from this State to another, or from one county to another is, according to the Federal law, slavery, but the majority of alleged white slaves are willing victims. In all my experience I have never found one case where a girl was being held against her will. Most of these showing girls being taken by force and fakes, and should be prohibited by ordinance."

Acid Stomachs Are Dangerous

Common Sense Advice by a Distinguished Specialist. "Acid" stomachs are dangerous because acid irritates and inflames the delicate lining of the stomach, thus hindering and preventing the proper action of the stomach, and leading to probably nine-tenths of the cases of stomach trouble from which people suffer. Ordinary medicines and local treatments are useless in such cases, for they leave the source of the trouble, the acid in the stomach, unchanged as ever. The acid must be neutralized, and its formation prevented, and the best thing for this purpose is a teaspoonful of bisaturated magnesia, a simple anti-acid, taken in a little warm or cold water after eating, which not only neutralizes the acid, but also prevents the fermentation from which acidity is developed. Foods which ordinarily cause greatest distress may be eaten with impunity if the meal is followed with a little bisaturated magnesia, which can be obtained from any druggist, and should always be kept handy.
