Thomas L. Elder, a Philadelphia collector of coins and curios. At the last session of Council he wrote that he had a \$3 note dated 1838 and issued by the "Borough of Harrisburg." Investigation showed that the note of the same date and number had been canceled long since and at Council's direction Mr. Miller wrote Mr. Elder that the note was evidently a counterfeit. Here's the reply Mr. Miller got:

Dear Sir: Referring to yours of the 15th, with a \$3 bill of the borough of. Harrisburg dated 1838. I don't believe this bill is a counterfeit and you have got unlimited nerve to stamp it counterfeit. I have handled thousands of old bank bills and know more about their genuineness than your esteemed council do. It is a very handy excuse to put a rubber stamp on any note sent for redemption. I have cashed another also which was identified with this one several years ago. You have maimed this bill for even a curiosity and I think an apology and some reparation is due me. I will put my opinion as a bill expert up against anybody in your city at any time. Very truly yours, THOMAS L. ELDER.

Of course you should "eat more bread"-but be sure your "bread" contains all the body-building material in the whole wheat, in digestible form. The only "bread" that meets these requirements is

made of whole wheat, steam-cooked, shredded and baked. It is a natural, elemental food and is not treated or compounded with anything. Endorsed by the highest health and dietetic authorities.
