County Commissioners Asked For Use of Courthouse on That Date

Dauphin county's road supervisors will probably gather in the court room March 27 for the first of the series of biennial conventions that have been planned for by the State Highway Department.

The state road department for some time has been planning a series of township supervisors' conventions in Physical and Financial Warrants, the chief purpose of which is the discussion of such matters as will lead to the development and improvement of road conditions. March 27 has been selected as the date for Dauphin's supervisors provided the date is convenient for the county commissioners, and at tomorrow's meeting of the county board the date will be considered. It is probable that March 27 will be decided upon. W. A. Myers, of the bureau of township highways, has asked for the date.

NEW OF THE RAILROADS

STEEEL CARS RULE PENNSYLVANIA LINES

Inventory Shows Large Increase in New Equipment in Seven Years

An inventory started by the Pennsylvania Railroad system four weeks ago to ascertain what cars on sidings awaiting repairs were available also brought the information that the Pennsylvania Railroad system 1,613 steel cars were now in service. This is 50 per cent. of all steel cars in the United States.

Contracts now in hand call for 378 more steel cars. The Pennsylvania is the first company to adopt steel cars, placing the first order during the year 1906. Since that time only steel cars have been built.

In addition to its own steel passenger equipment all of the Pullman cars (about 70) operating over the Pennsylvania system, lines east and west of Pittsburgh, are of steel construction. More than 40 per cent. of all the steel Pullman equipment in service in the United States is in use on the Pennsylvania railroad.

The company has 66,676 all-steel freight cars, 52,097 steel underframe freight cars and 1,610 wooden cars, a total of 161,233 cars.

During the year 1913 over 10,000 steel and steel underframe freight cars were placed in service, and there are now over 7,000 such cars under construction and being delivered.
