TAFT ON FUTURE OF REPUBLICAN PARTY

Expresses Belief in Ultimate Supremacy and Outlines Its Policies

Ex-President Taft, in a remarkably clear and forceful article in the current issue of the Saturday Evening Post, sets forth what he believes to be the future of the Republican party. In the last campaign "the Republican candidate," says Mr. Taft, "did not prove to be a strong vote getter. He had been subjected to such severe criticism and bitter attack for nearly four years, and his personality and motives and sympathies had been so misrepresented or misrepresented to the American people that many Republicans preferred Mr. Roosevelt as a man and were not embarrassed by the new doctrines he was proclaiming because they felt they would lose their possible danger under the influence of responsibility of power."

"Many Republicans were affected by the unfair accounts of the proceedings of the Chicago convention, colored to give the impression that injustice had been done by the controlling majority," Mr. Taft says. "The genius in the matter of securing publicity for what he says, and his persistent attack on the convention, circulated with all skill, had a great effect."

Of the future of the Progressive party Mr. Taft says: "Those of us who believe that Mr. Roosevelt's new theories of government will seriously impair that which we hold essential to the maintenance of liberty regulated by law are justified in thinking that the most important thing to the country is to defeat the Progressive party in presidential elections."

Admitting the possibility of the reelection of President Wilson, the writer is optimistic as to the ultimate supremacy of the Republican party and concerning its future policy he says: "We must direct our energies toward the amendment of the present banking and currency act that shall furnish an elastic medium automatically adjusting itself to the needs of business, without giving too arbitrary control to the government; a wise system for conservation of our national resources; the reform of judicial procedure, eliminating its expense and reducing its cost; the greater supervision of the business of and issue of securities by corporations in interstate business, and the continued enforcement of the anti-trust laws providing workmen's compensation for interstate railroad companies and regulating the relations between them and their employees, to prevent strikes, so far as possible, and to secure safety in operation for the public and the employees the taking of all local federal officers and all but department heads and to secure out of politics by putting them in the classified service; the improvement of rivers and harbors by a completed plan, a lease system for the Mississippi; the enactment of model laws for the District of Columbia, as to the control of public utilities; the maintenance of the public health, on the use of child labor, the regulation of tenement-house construction, investigation and arbitration of labor disputes, and the conduct of vocational education, of playgrounds, and of charitable and penal institutions; the enlargement of the bureau of education into a means of publishing to the world the exact condition of education in every State, with a view to stimulating much-needed progress in those primary and vocational training; the stimulation of the merchant marine; the creation and maintenance of a permanent tariff commission, with adequate power to report the facts as to the operation of the tariff; the adoption of a budget system and a plan for making government administration economical and efficient; the maintenance of an adequate army and navy; the conferring on the federal government power to perform our treaty obligations to nations by punishing those who violate them; the adoption and pursuit of a foreign policy that shall give us influence to the maintenance of just and peaceful governments."

"These are some of the constructive reforms to which the Republican party will address itself, and it shall secure before and of higher importance than all of these is the rescue of the country from the serious danger to which it is exposed in its attempted undermining of our stable civil liberty."

The Quickest, Simplest Cough Remedy

Easily and Cheaply Made at Home. Saves You \$2.

This plan makes a pint of cough syrup—enough to last a family a long time. You couldn't buy as much or as good cough syrup for \$2.50.

Simple as it is, it gives almost instant relief and usually conquers an ordinary cough in 24 hours. This is partly due to the fact that it is slightly laxative, stimulates the appetite and gives excellent tonic effect. It is pleasant to take—children like it. An excellent remedy, too, for whooping cough, spasmodic croup and bronchial asthma.

Mix one pint of granulated sugar with 1/2 pint of warm water, and stir for 2 minutes. Put 2 1/2 ounces of Pinex (fifty cents worth) in a pint bottle, and add the Sugar Syrup. It keeps perfectly. Take a teaspoonful every one, two or three hours. Pinex is one of the oldest and best known remedial agents for the throat membranes. Pinex is a most valuable concentrated compound of Norway white pine extract, and is rich in quinine and other natural healing elements. Other preparations will not work in this combination. The prompt results from this mixture have endeared it to thousands of housewives in the United States and Canada, which explains why the plan has been imitated often, but never successfully. A guaranty of absolute satisfaction, or money promptly refunded, goes with this preparation. Your druggist has Pinex, or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

Orpheum Wants to Buy Ocean of Water

WANTED — To buy, 500,000 gallons of clean, pure water at job lot price. Address Orpheum Theater.

The Orpheum has water on the brain just now, and if you know of anybody who has a cellar full of it just tell them they can get rid of it by carrying it down to the Orpheum and dumping it in any tank the Orpheum has ever had. You see, the six Water Nymphs — a half dozen girl divers and swimmers — are coming to the Orpheum next week and the tank that they use holds several thousand gallons more water than any tank the Orpheum has ever had. And it's had some big ones. Manager Hopkins, of the Orpheum, can't quite catch enough water to fill the stage clear, without much prospect of rain. Hence, if you have a job lot of water to sell take it down to the Orpheum.

An Easy Way to Get Fat and Be Strong

The trouble with most thin folks who wish to gain weight is that they insist on dragging the stomach or stuffing it with greasy foods; rubbing on useless "flesh creams," or following some foolish physical culture stunt, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract assimilates the food you eat. Thanks to a remarkable new scientific discovery, it is now possible to combine into simple form the very elements needed by the digestive organs to coax the stomach and intestines to literally soak up the fattening elements of your food and pass them into the blood, where they are carried to every starved, broken-down cell and tissue of your body. You can readily picture the reason why this amazing transformation has taken place and you notice how your cheeks fill out, hollows under your neck, shoulders and bust disappear and you take on from 10 to 20 pounds of solid, healthy flesh. Sargol is absolutely harmless, inexpensive, efficient. Geo. A. GORRAS and other leading druggists of Harrisburg and vicinity have it and will refund your money if you are not satisfied, as per the guarantee found in every package. **CAUTION.**—While Sargol has given excellent results in overcoming nervous dyspepsia, a general stomach trouble, it should not be taken by those who do not wish to gain ten pounds or more.
