members and prescribing their terms won't be submitted for a few weeks. The Commissioners last evening discussed probable appointments to be incorporated in a resolution that will go in Tuesday, under the provisions of the so-called Lynch "ripper" measure. Mayor Royal attended the conference. About fourth of the present police force will be dropped, it is understood, including ten or a dozen patrolmen and a sergeant. The sergeant to be dropped will be Thomas Rodgers and he is to be succeeded by Frank Elsenberg.

If City Detective Harry White is to be dropped as has been rumored to make room for ex-City Detective John Welsh, then this change will not be made before April 1. This also applies to the position of lieutenant, and it is understood that after April 1 ex-Lieutenant James P. Thompson will succeed Lieutenant Edward Worden.

In the rain, in the rain, leaf the valled the slanted fall, Flamelike in the humid gloom, Red as in that magic day, When two trod a magic way, Love-led through a blossom land. Love-led through a blossom land.

In the rain, in the rain, the rain, in the rain, in the rain to read the valled through a blossom land. The rain the wet wind's pleading voice, Crying soft: Rejoice! Rejoice! Rejoice! Rejoice! Rejoice! Rejoice! The good world make set., your hand! In the rain to blossom land.

—Martha McCulloch-Williams, in February Ainslee's.

Workmen Rushing Huge Palaces of Panama=Pacific International Exposition to Completion

HIS photograph, taken from the roof of the luge Palace of Machinery, shows a part of the main exhibit section of the Panama-Pacific International Exposition after three months of actual construction upon the buildings here shown. Before the buildings here shown under way.

Before the buildings here shown was accomplished. Great lagoons were filled in by suction dredges and more than eighteen months were spent in leveling and laying out the grounds and in preparing for the record-breaking

At the extreme left of the photograph is shown a portion of the Palace of Varied Industries; next in the foreground comes the Palace of Mines and Metallurgy, above which is to be seen a portion of the Palace of Manufactures. To the right are the rising frames of the Palaces of Transportation, Agriculture and Food Products. The large building with the dome in the center of the photograph, where is seen a pool of water, will be located the great central court, the Court of the Sun and Stars. More than 80,000,000 feet of lumber are being used in construction is numbered, and the foreman knows just where it goes. While the photograph gives an idea of the vast extent of the work, it does not reveal the splendors of the great Expedition. When completed a number of the towers, domes and tower gateways will rise higher than the first rim of the hills on the right, the Tower of Jewels being 430 feet in height. This photograph shows the outside walls of some of the buildings, which are identical in height with those of the World's Columbian Expedition in On the right above may be seen Fort Point, marking the entrance to the Golden Gate; below, to the right, is the broad esplanade, carpeted with green lawns and bordering San Francisco harbor.
