# HUDSON Six Upkeep Less Than a Four

At one time all Sixes were big, powerful, extravagant, Now we build them in smaller sizes, and by a different method. Thus we have secured all the wonderful advantage of six cylinders, yet have not increased the gasoline consump-tion. A HUDSON Six will cost you less for gasoline, oil, three and general upkeep than will a Four of equal power. In a score of contests we have proved this under average road conditions. score of co conditions.

This is also of special interest to the Hudson owners, as they have assurance of still greater efficiency in whatever mechanical adjustments may be necessary.

10 the influence of still greater efficiency in whatever mechanical adjustments may be necessary. The second state of Hudson motor cars are being inhoaded to-day. These are of various models and indicates a prosperous Spring business, judging from the early deliveries that are demanded. Speaking of the new Light Six, Mr. Dill said: "Most motorists think that to reduce upkeep expense means to cut down consumption of gasoline. Yet gasoline is the least of all the expenses of running an automobile. A whole year's saving of the difference between ten miles to the gallon and fifteen miles to the gallon and fifteen miles to the gallon is only \$26 on the average car. Much more important is the cutting down of costs on tires, repairs and adjustments. Owners both in Europe and America are demanding cars that will not only make good mileage to the slight difference gasoline economy can have fight difference and these hinge on the points of light weight—leas that 3,000 pounds, use only small amounts of lubricating oil light weight—leas the slight difference and these hinge on the points of light weight—less that 3,000 pouts of light weight—less that solo and smotor huming, which saves three by lessening the sligh and joit on the surface of the road. It weighs only 2,980 pounds; its vibrationless, smooth-run-ning six-cylnider motor avoids tire wear; it will go an extremely long dis-tance on a gallon of oil, and its gaso-line consumption averages lower than many of the widely advertised fours. Other manufacturers who are trying to produce an ideally economical car find it necessary to pattern after the Hud-son Six-40 design. It is very doubtful if a more economical car can be pro-duced."

 Pretty Girl Tells Tales
 Several boys who admitted that they are still in their teens and a pretty 15-year-old Palmyra girl told some tales of the doings at the Haeff-ner house that sent a few ripples of ex-citement through the crowded couri room. The girl's story was of frequent visits to the place with a mariled man of Philadelphia, of the drinks she ob-tained there and so on, following a walk from the park. The boys stories as a rule were of the behavior of the girls and boys they said they saw drinking in the place.
 While James A. Stranahan who is acting for the Civic Council of Fed-erated Churches and the No-License League, conducted the examinations for the remonstrants in general, he was assisted in the Haeffner house hearing by E.
