"Kid" Stricker Will Try Again; Has Cut Out All Bad Habits

Promising Young Star Who Exploded Last Season Has Signed to Play With York

"Kid" Stricker, the York pitcher whose advent in the Tri-State League was to have been a season's sensation, but who went to pieces, will be given another trial by Manager George Washington Heckert. A letter from the young twirler announces that he has "sown his wild oats" and is in good physical condition. Stricker writes that his arm is as good as ever, and that if he does not make good he will pay. Stricker started last season like a house afire. Manager Heckert took his squad to New Cumberland before the season started last year and Stricker twirled for New Cumberland. The York players, nearly all of whom were veteran professional players, were "standing on their heads" trying to reach the "Kidd's" slants, and only for errors back of him, Stricker would have won the game, for he allowed only four hits. Heckert at once signed him to play with the York team and he kept up the good work by downing the Chilseas nine in an exhibition game and then winning five out of his first seven starts against Tri-State League teams after the season opened. Stricker, like many others just starting out in league ball, could not stand prosperity and rumors of night-ly orgies reached the ears of the York leader. Then Stricker started to go to pieces and after he had been hammered hard in two or three games Manager Heckert released him. In his letter to Manager Heckert, yesterday, Stricker said that he intends to stick to the straight and narrow path.

Jackrabbit Sausage Is Good, Declares Farmer

Special to The Telegraph. Ballinger, Texas, March 20.—It has been discovered that jackrabbits can be made into excellent sausage. Experimenters say the sausage is more palatable than that made of pork. Jackrabbits are found in such abundance in west Texas that they are a nuisance and a real menace to growing crops. A widespread demand for the sausage would rid this section of a pest as well as help to lower the high cost of living. "Jackrabbit sausage has a taste somewhat similar to what chicken sausage would be," said a Runnels county farmer who has the delicacy on his table regularly. "It also has a taste of the so-called 'wild' taste, which makes its flavor delightful. I first tried mixing the meat with pork sausage, but found that the rabbit meat alone made an even tastier food. It was not made before this time. The supply is practically unlimited at the present time, and the manufacture of the sausage on a commercial scale probably would prove extremely profitable."
