When the meeting adjourned Mr. Carnegie got down on his knees and searched for the elusive dime until he found it. "Yes, Mr. Carnegie found the dime," said one of the guests seated near him. MONUMENTS

The granite or marble used in a monument expresses the sentiment desired by the person employing it to mark the last resting place of a relative.

Quality of the stone, artistry of design and cutting are the three Luckenbill qualities which produce memorial stones of the highest grade.

Luckenbill stones are works of satisfaction, but cost no more than others.

FIRST SIGLER PIANO PLAYER COMPLETED

New Harrisburg Industry Will Be Success in Opinion of Experts

C. M. Sigler to-day placed the first Sigler piano player on exhibition in his store rooms in North Second street. In the opinion of local musical authorities and several mechanical experts who saw the instrument and heard its work, the Sigler house has carved a lasting step in the world's ladder of musical progress.

Nothing quite like the Sigler player has ever been invented in any part of Europe or the United States. It is said. When not in use the player is absolutely invisible and the piano in which the action may be installed appears exactly like any ordinary instrument. The player can be placed in any instrument at a price that makes the action of great economic value in the musical trade. The action is nearly "fool proof," few parts of the mechanism being placed where people can try to change or readjust it, as is the case in many player pianos. The action can be placed in any piano that a customer may have in the home which he wants to convert into a mechanical instrument. The simple action was installed in one of the very smallest sized pianos, proving that it can be placed in any instrument made for the trade. Already Mr. Sigler announces the receipt of several orders for the new piano player and his factory force of fifteen men will be kept at full working time from to-day on.

The player is the invention of C. M. Bard, head of the Sigler house mechanical department. The Sigler factory is located at 426-428 Market street.

HOUSING PROBLEMS TO BE TAKEN UP

[Continued from First Page.]

Environment arise most of the evils of social life to-day. In the last two years more than one hundred cities and towns have awakened to the fact that the people must not be permitted to be huddled together in insanitary dwellings surrounded by filth and stench and other improper conditions. Every town and city has its own peculiar conditions to meet. Seldom are two alike and the purpose of a Housing Association is to act as a clearing house for information and experience in combating the various evils where they are already recognized and to set on foot a State-wide crusade against conditions which are responsible for the high death rate in many communities. In this work the need for co-operation is just as great as for any other progressive movement in the world and it is the duty of every organization and every individual who realizes his responsibility to his fellow man, to join hands with those who are working together for the common weal.
