Linking Push To Pull

When the manufacturer of a nationally advertised product comes into the columns of this newspaper with his announcement, he is spending money to pull customers into the store of the merchant who keep his wares. It is up to the merchant to put his push behind the manufacturer's pull. Push and pull together accomplish much. Push and pull in this sense mean intelligent co-operation. The means better service to the public. And the natural rewards of better service are increased business and profits. The linking of Push and Pull in the co-operative way is the right way. The Bureau of Advertising, American Newspaper Publishers Association, World Building, New York, will be glad to answer any question about co-operative work with dealers in newspaper advertising campaigns. Booklet on request.
