The Adjutant General pointed out that first the State must be asked to furnish troops and will designate what it wants, and then a mobilization point, which will depend upon the way the orders come from Washington, will be fixed, and the militia ordered to the camp by a certain day. Things will go just as in the Spanish War. War.

The protestant company showed that it has its plant and equipment erected in the city at the cost of \$2,300,000.
