Dumas won every vote but the vote of the envious. He made me happy, when a not particularly contented school boy. I read him often and Dumas improves at each time of reading. I have read him in French and I have read him in English. There is nothing better to be had. The heartiness, the large light, the loyalty, the tolerance, the wit, the brilliant and varied sequel of adventures rejoice the heart, and carry us out of our woe, times and troubles into an enchanted world.

COLONEL ROOSEVELT BUSY; DICTATES MANY LETTERS

Oyster Bay, N. Y., May 22.—It took two stenographers to keep pace with Colonel Roosevelt this morning, as he made his way through a mass of letters and telegrams and dictated replies. Several thousand of these communications have come to Oyster Bay since the Colonel's return from South America. His secretary went through them first, sorting out the ones which required the Colonel's immediate attention and after they had been cut down to an irreducible minimum there were still several hundred left and the Colonel sent to New York for an extra stenographer.

BIG ENGINE ORDER PLACED AT ALTOONA

Needed For Freight Service on the Pennsylvania Railroad Lines

Altoona, Pa., May 22.—An order placed with the Juniata shops of the Pennsylvania Railroad, for eighty-four class "L" locomotives yesterday, was the best news received in this city in many weeks.

A big boom at the Penn shops here is always taken as a forerunner of increased activity over the entire system. The order placed yesterday means work for a big army of men all summer.

The new locomotives are of a type known as the Mikado or "2-8-2" class. They have cylinders twenty-seven inches in diameter with a thirty-inch stroke. The dry weight is sixty-two inches in diameter and the rated tractive power is 57,550 pounds.

The minimum internal diameter of the boiler is 76 1/2 inches and the boiler is provided with 237 tubes 2 1/4 inches in diameter and forty tubes 5 1/2 inches in diameter. The Schmidt superheater being used.

These locomotives will be equipped with steel cabs, which are about two feet shorter than the average cab used on locomotives, the short cab being advantageous on account of giving the engine crew a better view of the track ahead.

Reading Has Another Election.—W. J. Richter, president of the Philadelphia and Reading Coal and Iron Company, was yesterday elected president of five subsidiaries of the Reading system, succeeding the late George F. Baer. The companies were: The Delaware Coal Company, the Locust Gap Improvement Company, the Preston Coal and Improvement Company, the Tremont Coal Company and the Reading Coal Company. The properties are all operated by the Philadelphia and Reading Coal and Iron Company.
