STEELTON MIDDLE TOWN & HIGHSPIRE PATRONS' DAY IN HIGHSPIRE SCHOOLS

Parents Visit Rooms to See Just What Youngsters Are Doing

Fathers, mothers, big brothers and sisters were given a chance to see just what the students of the Highspire schools do during "school hours" at the annual Patrons' Day exercises yesterday. All the rooms were thrown open to the public, and these were exhibited some of the best work done by the students during the past term.

Perhaps one of the most interesting parts of the display was the exhibits in domestic science and art department. In this department the students had made aprons, dollies and other sewing work done by the scholars of the fourth, fifth and sixth grade. Another exhibit that attracted considerable attention was the showing of basket-weaving and raffia work of the fifth, sixth, seventh and eighth grades.

On the blackboards about the rooms were samples of the free-hand drawing of the students in the art department. Other samples of art work were arranged in neat portfolios. The study of art was introduced in the Highspire schools just six months ago, with Miss Eleanor Shutter, of Steelton, as supervisor. The boys and girls are given instruction in mechanical drawing, while the students in the other grades and the girls are given instruction in perspective drawing, water color and crayon work.

Professor C. M. Weigle, principal of the schools, said that he was much pleased at the exhibit. "We have had these new departments but six months, and I think the students have done remarkable work for such a short time," said he.

RELIEF FROM DYSPEPSIA

All conditions of depressed vitality tend to disturb the processes of digestion. There is not a disturbed condition of life that may not affect digestion.

Few causes of indigestion are so common as thin, weak blood. It affects directly and at once the great processes of nutrition. Not only is the action of the gastric and intestinal glands diminished, but the muscular action of the stomach is weakened. Nothing will more promptly restore the digestive efficiency than good red blood. Without it the normal activity of the stomach is impossible.

Thin, pale people who complain of indigestion must improve the condition of their blood to find relief. The most active blood-builder in such cases is Dr. Williams' Pink Pills. They make rich, red blood which quickly restores the digestive organs to their proper activity and the first result is hunger. The dyspeptic who has hated the sight and smell of food now looks forward to meal time with pleasurable anticipation. Care now in the selection and quantity of food will put the patient well on the road to health. A diet book, "What to Eat and How to Eat," will be sent free on request by the Dr. Williams' Medicine Co., Schenectady, N. Y. All druggists sell Dr. Williams' Pink Pills.--Advertisement.
