A STOMACH TONIC

There is a form of indigestion called "atonic" dyspepsia. Atonic means "lack of tone." It is probably the most common form of indigestion, but not much is heard about it because people are inclined to group all forms of dyspepsia as "stomach trouble" and the doctors let it go at that. Lack of tone in the digestive organs means that the stomach is no longer able to do its work as nature intended. The nerves that control it are weak, the glands that supply the digestive fluids are not working properly. Gas on the stomach, sour risings in the throat and constipation result. The cause of the trouble is thin blood. Stomach, nerves and glands are all dependent on the blood and when it gets thin and watery they are at once weakened. Dr. Williams' Pink Pills act directly on the blood and the first response from the stomach is a better appetite, freedom from distress after eating and an increase in ambition and energy generally. Try Dr. Williams' Pink Pills as a stomach tonic and see how your general health improves. A diet book, "What to Eat and How to Eat," will be sent free on request by the Dr. Williams Medicine Co., Schenectady, N. Y. Every drugist sells Dr. Williams' Pink Pills.—Advertisement.
