He was asked what he thought was responsible for the retardation in business. He declared that he believes the equanimity of affairs has been upset by tariff legislation and the administration's attitude toward business. The financial situation, he believes, is sound.

financial situation, he believes, is sound.

"I look for a great landslide for the Republicans in 1916," Mr. Frick went on, "and I would like to see the Republicans get control of the Senate in the next election."

Mr. Frick does not agree with President Wilson in his contention that the present depression is more psycholigical than real and pointed out a few examples of retardation.

"They are importing pig iron to this country from China, where the workmen get about 6 cents a day. When the Republicans again get into power there will be a lot of damage to repair."

Queen Mary Threatens

to Leave London Because of "Furies" Activities

By Associated Press
London, June 13.—Queen Mary has decided in case of further suffragette demonstrations in the vicinity of royalty to quit London abruptly and leave King George to finish the season alone according to a source in close touch with the court and the government.

The queen is represented as being in a state of nervous tension as to when and where the next suffragette will appear. She, it is said, has no intention of allowing her existence to be made unhappy by those she habitually calls the "furies."

Should the queen be forced to carry her threat into execution, the step will create an unparalleled social sensation.

Niagara Falls, Ont., June 13.—The Mexican delegates to the mediation conference to-day received through the three South American diplomats the formal answer of the United States government to their protest made last Sunday against the landing of arms for the Constitutionalists at Tampico from the steamer Antilla.

The Washington government in effect sets forth its regret that a misunderstanding over jurisdiction between the departments of commerce and treasury gave clearance papers to the Antilla, which it had not been intended side should have.

The mediating colony turned their thoughts to-day from diplomatic forms and protocols to questions of personnel for the new provisional government of Mexico. They began the search for the man of the hour—a successor to Huerta who shall be acceptable to all factions, capable of pacifying Mexico so that a constitutional election may be held.

Trade Commission Bill SULPHUR DRIES **Newlands Reports New**

By Associated Press

Washington, D. C., June 13.—Chairman Newlands to-day reported the Senate interstate commerce committee Federal trade commission bill as a substitute for the House bill. He said the action of the committee had been nonpartisan and that he saw no reason for delay in passing the measure. He denied that the bill is inquisitorial.

"The commission," he said, "will require reports only from those corporations designated by it and the number will be comparatively few. Honest corporations have nothing to fear from legislation aimed only against outlaws. The powers must be general, but their exercise will be aimed only at violators of the law.

Mr. Newlands explained that his committee would soon report its second trust measure, a railroad securities bill.
