New Harrisburg Hospital to Be Built Within Two Years on Allison Hill

Within the next two years this city will have a new Harrisburg Hospital. While no official announcement to this effect will be made for some time by the Harrisburg Hospital management, members of the Board of Governors this morning admitted that the old hospital building will be abandoned and a new and up-to-date structure built within a comparatively short time.

The new institution will be erected on Allison Hill. The exact spot has not yet been decided upon. Work on the new institution will likely be started in about a year, according to members of the Board of Managers. A member of the Governor's Board in discussing the erection of the new hospital, said: "For several years the hospital management has been quietly discussing the need of new quarters. The noise from the Cumberland Valley railroad is a constant source of annoyance and decreases the efficiency of the institution. When the railroad improvements are completed here and the subway and double track bridge is built the noise and bustle of traffic will be greater still. Then, too, we haven't room here for expansion. We will have to locate elsewhere and it will be doubtless somewhere on Allison Hill."

COULD USE EARTH FROM EXCAVATIONS FOR RIVER FRONT

Many Puzzled as to Action in Hauling Away Tons of Good Material

The average citizen cannot understand why thousands of tons of filling material which is needed to complete the park treatment of the river front is being deposited in quarry holes and waste places along Cameron and Paxton streets. Inquiry of the statement that the cost of hauling this material now being excavated in Mulberry street, at Front and Second streets, is regarded as too heavy to justify the expenditure, much as the dirt is needed now and will be needed hereafter. This matter was under consideration by the City Council, but the proposals for hauling were regarded as too high and nothing more was done. Already 2,000 loads have been deposited in the vicinity of Cameron and Paxton streets and the contractors stated to-day that there would be at least 20,000 more loads before the excavation shall have been completed.

MEDIATION IS ON BRINK OF FAILURE; WILSON IS ALARMED

President Will Stand Squarely on Statement Framed by American Delegates

HE PREPARES STATEMENT

Says He Has No Plans to Go Before Congress as Result of Present Crisis

Washington, D. C., June 19.—President Wilson stands squarely on the statement given out at Niagara Falls by the American delegates and will accept no settlement of the Mexican problem which is not based on the principles outlined therein. This was made clear by officials after the President had an early conference with Secretary Bryan. If mediation fails the President plans to issue a statement fully informing the public on the position of the administration and outlining his future course. The President has no plans for going before Congress with any phase of the Mexican situation and all talk of further armed intervention is groundless at the present time, according to officials in close touch with the situation. The same, they say, may be said of reports that the United States plans to recognize General Carranza, General Villa or any other faction in Mexico.

The celebration will be under the auspices of the city and is expected to include a military parade. In connection with the safe and sane celebration, special efforts are being made by the city authorities to reduce the number of killed and injured.

\$600,000 Automobiles

The trade estimates that the sales of automobiles for 1914 will aggregate a total of \$600,000,000. And yet some pessimists talk about dull times. It is interesting to note that this immense volume of business has been largely built up through persistent advertising linked with consistent salesmanship. And more enlightening still is the fact that much of the large percentage of automobile advertising is used in the daily newspapers. The newspaper advertising which in most cases is directly linked up with the name of the local dealer is the sales message that brings direct results. The automobile is a useful servant, but had there not been such aggressive and intelligent advertising its manufacture would still be among the infant industries.
