Dissolution Suit Under Sherman Law May Yet Be Averted, Belief of Many

By Associated Press

New York, July 17.—The statement of the board of directors of the New York, New Haven and Hartford Railroad that "the directors have neither receded from their position, nor closed the door to further negotiation," is an indication, it is said to-day, that the contemplated dissolution suit under the Sherman law may yet be averted. The bill in a suit in equity for the separation of the Boston and Maine from the New Haven system has been prepared for some time. Reports from Washington that Presdent Wilson might be asked to bring about a compromise and thereby possibly avoid a dissolution suit, served to strengthen a general belief that the government and the New Haven directors would again attempt a friendly settlement.
