"Eloping" is the name of the Lasky playlet, and while there are only four people in the cast, the action of the plece compares favorably with that in the larger Lasky acts that have proved so overwhelmingly popular in Harrisburg. Dr. Dixon Gives Some Pointers **About Going Swimming When** in the Country

Dr. Samuel G. Dixon, State Commissioner of Health, points out some dangers of which the average person who goes to the country for a day is not aware in his weekly talk on health matters. The Commissioner is fond of outdoor life and he gives pointers which are well worth reading and heeding. He says:

"There is a common but erroneous idea that clear water is pure water. Unfortunately this is untrue, as many a stream which to all appearances is uncontaminated carries the germs of typhoid and dysentery.

"Throughout the summer months thousands of camps dot the streams and woodlands and the seekers after health and pleasure naturally turn to the streams for their water supply and bathing purposes. Often camps are located close together and if there is careless disposal of the wastes by those up stream they become an active menace to those below.

"For the sake of safety be careful in selecting a bathing place. Streams should be avoided which are contaminated by city sewage. Where there is any doubt regarding the character of the water it is better to boil the entire supply used for drinking and culinary purposes and to forego the pleasure of the water it is better to boil the entire supply used for drinking and culinary purposes and to forego the pleasure of swimming.

"On picnics and excursions to the country unused wells and those in barnyards or near outhouses should be avoided. Even springs are not always to be relied upon for they are often contaminated by the drainage from adjacent properties. The alluring roadside spring that looks so tempting to the weary traveler on a hot day is often so located that it receives road drainage and is unfit for use. It is far better to suffer a temporary inconvenience from thirst than to risk a drink from a questionable source.

"The general adherence to these suggestions would save much of the typhoid which for years has been an inevitable accompaniment of the vacation season."
