Mr. Wolf says the act of 1913 takes precedence, citing numerous instances where its provisions supersede the earlier statute, saying it is "manifestly inconsistent with the act of 1913." Head of Firm Says Report Is False and That Plant Has Many Orders

Reports current in Steelton this morning to the effect that the John Hoffer flour mills, the borough's largest industry with the exception of the Steel Works, would be closed down this evening, were denied by John Hoffer, Jr., head of the firm.

"I don't know where the rumor started," said Mr. Hoffer. "We are now working double turns and have booked enough orders to keep us run-ning a long time. We are able to get all the wheat we want. Our present capacity is about 1,800 barrels a day and would be greater if we only had more mills. We could use them." Mr. Hoffer explained that the mills are so rushed that they couldn't even close down for the usual annual repairs.
