Others of Party Have Narrow Escape From Death From Flying Debris

Special to The Telegraph
Marletta, Pa., Aug. 28.—A distressing accident occurred at Smoketown, a little town in the county several miles from Lancaster, yesterday, causing death and destruction. A bursting boiler at the old Weaver mill, on the Bowman farm, killed a boy, seriously injured his father and wrecked the mill.

Amos Burkhardt and son, Amos, Jr., left their home at Turkey Hill to go to the mill for the purpose of boiling applebut-ter. When they reached the mill they found the owner, H. L. Bowman, and his son there, with Amos Martin. Preparations for making the butter were immediately begun. Fire was lighted under the boiler and in a short time the steam gauge registered forty pounds. THEATRE OPENS '14-15

Changed Appearance of House Commented on by Audience; "Neptune's Daughter" Pleases

The theatrical season got under full swing last night when the Majestic season opened for a season that promises to be replete with splendid attractions. For the first time in the history of the theatre the production was featured as an opener, and attracted a large audience. The picture "Neptune's Daughter" was the first dramatic situation that delighted the theater-goer, and also furnished a wealth of scenic pleasure that would have been impossible of exhibition on the legitimate stage. The Universal company, headed by the playhouse featuring Annette Kellermann in "Neptune's Daughter," was the attraction.

Through the seven reels Miss Kellermann—who appears as Annette—the chief daughter of Neptune—dives, frolics, swims and dances, truly a daughter of the sea, a queen of the many tribes. In the principal figure in the romantic drama of land and sea, of the realms of the immortal King of the Sea, and the mortal King of the land, Kellermann is ever on the screen—the mermaid swimming through placid, deep waters, overhung with brilliant starlight, as the mortal who changes her fins for legs, as the young woman gowned in silks and satins.

Best of the season is "Neptune's Daughter," a tremendously effective scene—witness her father of the danger, and warns her father of the danger, and she is drawn on the beach and dies. Annette swears vengeance upon King William. From the beach she is rescued by a shell which makes her a shy, mortal maiden. A kindly old woman takes the girl and she becomes a member of her household. The king, tired of a court intrigue, sallies forth incognito and finds Annette, her father, and she falls in love with her.

People With Thin Blood

Some people have a tendency to become thin-blooded just as others have an inherited tendency to rheumatism, or to nervous disorders. The condition in which the blood becomes so thin that the whole body suffers comes on so gradually and stealthily that anyone with a natural disposition in that direction should watch the symptoms carefully. Bloodlessness, or anemia, as the medical term is, can be corrected much more easily in the earlier stages than later. It begins with a feeling that rest does not overcome, the complexion becomes pale, and breathlessness on slight exertion, such as going up stairs, is noticed.

Dr. Williams' Pink Pills are a home remedy that has been most successful in the treatment of diseases caused by thin blood. With pure air and wholesome food these blood-making pills afford the correct treatment when the symptoms described are noticed. A former sufferer from anemia says: "I was emaciated and did not have a particle of color. I had severe headaches, had no ambition and could just drag around." Dr. Williams' Pink Pills quickly restored appetite, flesh and health. A full statement of this case, with directions regarding diet, will be found in the booklet, "Building Up the Blood," sent free by the Dr. Williams Medicine Co., Schenectady, N. Y.—Advertisement.

Coal Prices Will Advance

The price of all coal, except Pea and Buckwheat, will advance 20c per ton on September 1st.

Besides the difference in the price, the coal you get now is much better quality owing to the fact that there is not much demand for coal in summer and plenty of time is taken to prepare it properly.

The 20c per ton you save now is really the smallest part of the transaction for "It is not so much How Much you pay for coal, it's What You Get for what you pay." Quality is the thing to consider.

Also remember that labor conditions in the coal regions may become serious, owing to the war, and no one knows what effect it will have on the price and quality of coal.
