# Eldredge Two Spool Rotary Sewing Machine

*The Triumph of the 20th Century*  
*No Bobbins to Wind*  
 To see it is to want it— to try it is to buy it.  
 How This Machine Operates  
 You sew direct from two spools of thread. The lower spool fits in the spool case (see cut) which answers the purpose of a shuttle, while the other is placed on the spool pin, as usual.  
 You will not be annoyed by the lower thread running out unexpectedly in the middle of a seam. The amount of thread on the lower spool is indicated by that on the upper spool.  
**BUY IT NOW**  
 THE AUTOMATIC TENSION is a genuine time saver—it produces a perfect stitch, without adjustment, on all classes of work. It saves the time necessary in changing tension, required on the ordinary machines. The Stitch Regulator has a wider range than any other machine—beginning with four stitches to the inch for basting and increasing in ten different ranges up to 40 stitches to the inch.  
**EASY TO OPERATE**  
 Bastes better than by hand—does embroidery and pennant work with wool yarn—uses any size thread from finest to the coarsest.  
 FIFTH FLOOR—BOWMAN'S.
