I do not mean to say that such facts have never been collected before, but the facts brought out in a very striking way that not all of our high school boys and girls are rendered unfit for the active duties of life because they are attending or have attended the high school. You doubtless have read the dastardly criticisms published early in the year of 1912 and wondered whether or not support such an institution as our free public school. The such and institution as our free public work was true. To satisfy myself for being a party to such an infamous institution, for such it is if it is ruining the youth of our country. I decided to collect some data. I asked the pupils what they had been doing and what they had earned in this doing.

With the opening of schools the awakened public feeling in regard to the imperative need for thrift teaching is expected to make the year of 1914-5 a decided improvement over the past.

EVENING CHAT

"In all of my experience I have never known as rigid application of censorship on war news as we are experiencing in the great war now in progress in Europe," said a man experienced in newspaper work and a wide traveler while here a few days ago. "I recall distinctly the days of the Civil War because I was a young man then and it was from twenty-four to thirty-six hours before we got authentic information from the fighting zone and it was within a few hundred miles of us much of the time. We did not know until after midnight of the day of Lee's surrender that he had given up, but when we got it it was straight. The Franco-Prussian war was marked by prompt enough dissemination, but the news came from French sources, not from German, just the reverse of the present. We knew of Sedan in interior towns of Pennsylvania as soon as we knew of Lee's surrender. I recall, too, the rapidity French sources, not from German, just the reverse of the present. We knew of Sedan in interior towns of Pennsylvania as soon as we knew of Lee's surrender. I recall, too, the rapidity with which we got news from the war in Turkey in the late seventies, but that was probably due to the splendid English correspondents in the field and to the fact that London was not as vitally interested in the war as she is to-day. In later days do you remember that it was not until twelve hours after the Spanish fleet had been destroyed that Washington turned loose official announcement of the success of our navy and that, too, in the face of the fact that the streets were full of rumors in the afternoon that there had been a battle? Then, too, remember how we got news on the night of May 1 that it had been "a sad but glorious day for Spain" long before we received official announcement from Washington that Dewey had performed a wonderful feat? In this case the censorship is put on as a matter of protection to the warring nations, but the trouble is that it is so complete that a very important object of censorship is defeated—preparation of the people for news of an official character. This war has been productive of everything except news, and you have to dilute what comes about 50 per cent. To meet the demand for news the news associations have to take reports which are brought by soldiers, refugees or residents, and that is unconsciously colored and of such a nature that in ordinary times it would never be used without being closely followed up. Hence the stories of one day are denied the next. But most official announcements are just as bad."

One of the most notable things about Harrisburg's success in the race for the Tri-State pennant is that the per cent, of the lcub's over .700, a record that is unique in the country. Search of the standing of the leading leagues of the eastern part of the United States does not show any club with so high a rating. The peerless Athletics lead the American aggregate with a percentage considerably below that held by Harrisburg and it is doubtful if any of the western leagues or any of the "bush leagues" can show a victorlous team with such a high per-"bush leagues" can show a bus team with such a high per-e as has been won by Cockill's

"What are they?"

"Oh. They are people who would like to go back because work is slack in this country, but who do not want to return because they will be put into a uniform and sent to charge a machine gun. So they move from place to place hunting work. I'll bet that band has been in every steel town between Bethlehem and Gary," said the railroad man. Unless the county commissioners and

Unless the county commissioners and the interested township authorities avail themselves of the contract sent to them for approval by the State Highway Department for improvement of the Union Deposit road, this county may lose a share of State money set apart for construction of highways on the State aid plan. It is stated at the Capitol that the funds processor, to apart for construction of highways on the State aid plan. It is stated at the Capitol that the funds necessary to construct the State's 50 per cent. share of the highway will revert to the State Treasury and the county be deprived of their use unless the contract is signed. This is due to the fact that money not used or requisitioned within a certain period goes back to the general funds automatically and some other county will get the benefit.

Doctor Brumbaugh tells the farm-

Doctor Brumbaugh tells the farmers that what we need is "vocational training" in our country schools. Breaking that long word into small bits, the doctor means that the country school shall teach the country boy and girl the very things which they should know to keep them on the farm both a joy and a profit.

The doctor never made a cleaner bull's eye than that. We can talk "back to the land" until we are blue in the face, but nobody will go back except under two conditions, to wit: That the farm be made more agreeable socially, and that it produce more cash. Boys and girls who live in the country must be taught how to raise an entirely new crop of joy and a bigger crop of dollars.

That knowledge will keep them on the land and nothing else will do it.

DETRICH GETS A BIG JOLT

Dr. Brumbaugh Simply Says Something Isn't So; McCormick Bund Beaten in Erie

In spite of indications which they believed would lead to an announcement by William Draper Lewis that he would drop his gubernatorial aspirations and allow Vance C. McCormick to take his place as the Washington party candidate for chief executive of Pennsylvania, Democratic machine men were to-day confronted with the announcement that the dean intended to keep a speaking date at Arnot, Tloga county, and might make more speeches later in the week. Consequently the call for a meeting of the Democratic State executive committee to pass on the formalities of the deal will not be issued. The Bull Moose bosses have not said anything

the deal will not be issued. The Bull Moose bosses have not said anything to-day and about all that has been given out is an interview with William Flinn, in which he says he is about ready to accept fusion.

On the subject of fusion the Philadelphia Press of to-day says:
"Bull Moose-Democratic fusion was attacked last night by William N. McNair, Democratic candidate for Secretary of Internal Affairs, on the ground that it savored too much of a political deal. Mr. McNair said he was in favor of every party fighting its own issues to the finish without attempting amalgamation with another party whose tenets must differ to some degree. Regarding his own withdrawal whose tenets must differ to some de-gree. Regarding his own withdrawal in the interests of harmonious fusion, should such action be agreed upon by the leaders of the two parties, Mr. Mc-Nair declared that such a course would seem to him a betrayal of the people who had supported him in the primaries. This would especially ap-ply, he said, to the Single Taxers, to whom he stood as an exponent of a vital principle."

Dr. Brumbaugh and Senator Penrose were out on the stump on Saturday at different ends of the State and both received notable receptions. The Sen-Brumbaugh ator spoke to large Restates audiences in half a dozen towns in the Allegheny valley and addressed two big meetings in Tarentum and New Kensington. He will be in Pittsburgh today and go to Philadelphia on Wednesday. Dr. Brumbaugh toured Bucks county, where he addressed Grange meetings and other gatherings, refterating his stand for local option, recasting of the child labor laws, justice to workingmen and a workmen's compensation that will stand the test of the courts. The doctor received a notable reception and in districts which have been claimed by Democrats most of the population turned out to greet him.

Palmer-McCormick men were routed in their attempt to secure an endorsement of the State ticket at the annual meeting of the Eric county Democratic committee at Erie on Saturday. "There was no such meeting. It is doubtful if Mr. Kolb ever at any time had Senator Penrose in his home. At any rate Dr. Brumbaugh never met the Senators in Mr. Kolb's home as alleged by Mr. Detrich. Senator Penrose had absolutely nothing whatever to do with the doctor's candidacy. He became a candidate when his friends in the Huntingdon Valley urged him to enter the race. Previously he had told fellow educators at Richmond that he would run if the 'folks in the valley' desired him to do so.'."

Berks county Republicans started off their campaign with a meeting of the county committee which re-elected Chairman C. D. Worley and adopted resolutions endorsing the Republican ticket. The speeches criticised the President sharply for the war tax.

(United States Review)

In view of the present abnormal financial situation in this country incident upon the war in Europe, special effort is being made by fire underwriters to arouse the public to the importance of exceptional care for the prevention of fires. All reasonable safeguarding in that direction is in order, of course, even under normal conditions, but at this particular time it is of the greatest public concern. No man can forcetell when the next great confiagration is to come and add one more to the lurid catastrophes of the past, but every underwriter and thoughtful observer well knows that it may occur at any time.

If it should happen to come while present conditions prevail, with the stock exchanges closed and the money market abnormally tight, the result to the fire insurance companies would investibly be most serious, because in

market abnormally tight, the result to the fire insurance companies would invitable be most serious, because in order to pay their losses they would be compelled to sell large amounts of their securities at lamentable sacrifices, which in all cases would add heavily, and in some cases, perhaps, disastrously, to their aggregate money losses.

Thin-blooded people generally have stomach trouble. They seldom recognize the fact that thin blood is the cause of the indigestion, but it is.

Thin blood is one of the most common causes of stomach trouble. It affects the digestion at once. The glands that furnish the digestive fluids are diminished in their activity, the stomach muscles are weakened and there is a loss of nerve force. In this condition nothing will more quickly restore appetite, digestion and normal nutrition than good, rich, red blood.

Dr. Williams' Pink Pills act directly on the blood, making it rich and red, and the enriched blood strengthens weak nerves, stimulates the tired muscles and awakens to normal activity the glands that supply the digestive fluids. The first sign of returning health is an improved appetite and soon the effect of these tonic pills is evident throughout the system. You find that what you are strong and vigorous instead of irritable and listless. You are now on the road to health and care in the diet is all that you need.
